

**Request for Addition of Herbicide, Use Area, or Technique to List of Approved  
Herbicides**

Bonneville is only allowed to use herbicides that have gone through Bonneville environmental review and placed on our approved herbicide list. If there is a product that you would like added to that list for your use, fill out the request sheet below and mail, fax to: **Manager, Pollution Prevention and Abatement – EP-4** for initiating the review process. Phone: 503-230-3655 or 503-230-4722. Fax: 503-230-7591

**What we will do with the Request**

Pollution Prevention and Abatement will look at the potential environmental impacts of the product, and compare those impacts with those described in the Vegetation Management Program EIS. If the impacts are similar or less than those analyzed in the EIS, then we will perform the steps necessary to conclude the addition. If the potential impacts are greater than, or have not been analyzed, in the EIS, we will work with you to determine if there are other products that can meet this need. Products that do not have similar impacts to those described in the EIS will require a supplemental EIS and a new Record of Decision.

**Questions?**

Call Manager Pollution Prevention and Abatement.
