Response: As stated in Section 3.4.3, the Applicant would implement a noxious weed control program, in coordination with the Skamania County Noxious Weed Control Board, to control the spread and prevent the introduction of noxious weed species. The exact type of herbicide that might be used has not been determined. For more information on Skamania County's program, please visit their website at: <http://skamania.wsu.edu/noxiousweeds/index.html>.
