

BPA Launches Online Lighting Calculator

BPA's cloud-based Online Lighting Calculator (OLC) is now live!

Access the OLC

BPA will create one administrator account for each organization following OLC training. Your administrator will then receive an email with temporary login credentials and guidance on how to get started. The administrator can create standard user accounts or view-only accounts for other staff within their organization.

Comprehensive Training

BPA offers weekly online training sessions and “office hours” for added support throughout the spring. Visit the [OLC landing page](#) for schedule and details.

Training and Support Resources

A User Manual and a Frequently Asked Questions document are available on the [OLC landing page](#). BPA will expand and improve both resources over time. You can submit questions or requests to lighting@bpa.gov.

Next Steps

Please reach out to your Energy Efficiency Representative with any questions, needs, or concerns.
