

Webinar: Open Q Pilot Update

When: Oct. 30, 2025

Time: 10–11 a.m. (PDT)

Presentation and discussion:

Please join for the Open BPA Qualified (Open Q) pilot update webinar. In 2024, BPA launched the Open Q pilot, which allows utility customers to propose novel energy saving programs not featured in the BPA's Implementation Manual for technical review. Upon BPA review and approval, customers can implement these programs and claim savings and payment for up to two years prior to evaluating performance. Now one year into this pilot, BPA would like to review the results, share success stories, and highlight the ongoing opportunity for customers that have not participated.
