

Categorical Exclusion Determination

Bonneville Power Administration
Department of Energy

Proposed Action: T-Mobile LTE Antenna Upgrade at West Portland Radio Station

Project Manager: Jonathan Toobian – TELP-TPP-3

Location: Multnomah County, Oregon

Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021): B1.19 Microwave, meteorological, and radio towers

Description of the Proposed Action: Bonneville Power Administration (BPA) proposes to allow T-Mobile to upgrade long-term evolution (LTE) antennas on the existing T-Mobile system that is located at the BPA West Portland Radio Station in Multnomah County, Oregon. The existing antennas would be replaced due to technological advancements.

Specifically, a BPA-certified contractor with a BPA safety watcher on site would install two new antennas, one new antenna mount, and one new hybrid cable with pendant at the top of the existing steel lattice radio tower. In addition, the replacement and/or addition of corresponding telecommunications equipment would occur within the equipment shelter in T-Mobile's fenced area underneath the radio tower on BPA fee-owned property. The project would not involve ground excavation and would use established access roads and work areas.

Findings: In accordance with Section 1021.410(b) of the Department of Energy's (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, Jul. 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011), BPA has determined that the proposed action:

- 1) fits within a class of actions listed in Appendix B of 10 CFR 1021, Subpart D (see attached Environmental Checklist);
- 2) does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal; and
- 3) has not been segmented to meet the definition of a categorical exclusion.

Based on these determinations, BPA finds that the proposed action is categorically excluded from further NEPA review.

Attachment(s): Environmental Checklist

Categorical Exclusion Environmental Checklist

This checklist documents environmental considerations for the proposed project and explains why the project would not have the potential to cause significant impacts on environmentally sensitive resources and would meet other integral elements of the applied categorical exclusion.

Proposed Action: T-Mobile LTE Antenna Upgrade at West Portland Radio Station

Project Site Description

The project site is located at the BPA West Portland Radio Station in Multnomah County, Oregon. It is located in Township 1 North, Range 1 West, Section 15. The project would occur within a gravel-covered and fenced area that has one 140-foot-tall steel lattice radio tower and a telecommunication equipment shelter at the base. The site abuts the City of Portland's Forest Park along its north west property line and is approximately 1.5 miles west of the Willamette River. The surrounding area is comprised of the primarily forested land, with several agricultural land uses nearby.

Evaluation of Potential Impacts to Environmental Resources

1. Historic and Cultural Resources

Potential for Significance: No

Explanation: No ground-disturbing activities would take place. BPA's archeologist determined no potential to affect historic properties or cultural resources on April 23, 2021.

2. Geology and Soils

Potential for Significance: No

Explanation: The proposed activities would not require ground-disturbing activities.

3. Plants (including Federal/state special-status species and habitats)

Potential for Significance: No

Explanation: All work in existing equipment area; no special-status species present or disturbed. Existing roadways and established work areas would be used.

4. Wildlife (including Federal/state special-status species and habitats)

Potential for Significance: No

Explanation: All work in existing telecommunications area; no habitat present.

5. Water Bodies, Floodplains, and Fish (including Federal/state special-status species, ESUs, and habitats)

Potential for Significance: No

Explanation: The proposed activities would not require in-water work or ground disturbance that would produce sediment that could enter nearby waterways.

6. Wetlands

Potential for Significance: No

Explanation: The proposed activities would not require ground disturbance that would produce sediment that could enter nearby wetlands.

7. Groundwater and Aquifers

Potential for Significance: No

Explanation: No ground disturbance proposed.

8. Land Use and Specially-Designated Areas

Potential for Significance: No

Explanation: There would be no change to land use at this location and it is not located in a specially-designated area.

9. Visual Quality

Potential for Significance: No

Explanation: The new antennas would be a like-for-like replacement of the existing antennas; therefore, they would be visually consistent with existing conditions.

10. Air Quality

Potential for Significance: No

Explanation: The activities would generate a small amount of vehicle emissions and dust during construction.

11. Noise

Potential for Significance: No

Explanation: Some temporary construction noise would occur during daylight hours. The operational noise of the antennas would not change.

12. Human Health and Safety

Potential for Significance: No

Explanation: Workers would follow all standard safety protocols. Activities would not impact human health or safety.

Evaluation of Other Integral Elements

The proposed project would also meet conditions that are integral elements of the categorical exclusion. The project would not:

Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders.

Explanation: N/A

Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators) that are not otherwise categorically excluded.

Explanation: N/A

Disturb hazardous substances, pollutants, contaminants, or CERCLA excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases.

Explanation: N/A

Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.

Explanation: N/A

Landowner Notification, Involvement, or Coordination

Description: No notification – all work on BPA fee-owned property and no visual or other effects to adjacent landowners.

Based on the foregoing, this proposed project does not have the potential to cause significant impacts to any environmentally sensitive resource.
