

North Bend Maintenance Headquarters Replacement

The North Bend Maintenance Headquarters Replacement project includes the purchase of a new property, developing the site, designing and constructing a new Administration building, a new Maintenance building, and demolishing the existing facility. The purpose of this project is to provide lifecycle replacement for the North Bend Maintenance Headquarters with a safe, resilient, and modern facility to provide the following benefits.

- Provide health and safety to BPA employees and contractors.
- Provide continuity of operations and maintenance immediately following a major earthquake.
- Provide property and equipment preservation due to any seismic activities.
- Provide adequately sized site and facilities that meet work requirements.
- Maximize value by reducing maintenance and operational costs to facilities.
