# Agency Net Revenue Crosswalk from Rate Case to Target

Presenter: Manny Holowatz

# Net Revenue Target Crosswalk

## Rate Case to Target Agency Net Revenue Crosswalk

● Increase ● Decrease ● Total

# Rate Case to Target Agency Net Revenue Target Crosswalk

The Agency Net Revenue target is **\$214.2M less than** rate case mainly due to:

## Non-IPR Expense: **Increased Target over Rate Case by \$66M**

- Power
  - The increase is largely driven by the removal of Tier 2 power purchases, as these will now be served by FCRPS resources.
  - Higher short-term power purchases partially offset this increase.
- Transmission
  - Minimal impact on non-IPR expense changes.

## Operating Revenues: **Decreased Target from Rate Case by \$94M**

- Power
  - The decrease is primarily due to lower-than-expected Power revenues, driven by lower inventory due to drier conditions and serving Tier 2 purchases from the FCRPS.
- Transmission
  - The reduction is partially mitigated by increased revenues in Transmission, attributed to higher Southern Intertie ST revenues from wider price spreads between southern and northern hubs.
    - Reimbursables revenues are also expected to increase because of increased reimbursable expense work and PFIA.

## IPR Expenses: **Decreased Target from Rate Case by \$186M**

- Power
  - Generating partner budgets increased to meet continued labor and materials inflationary pressures.
  - Increased Fish and Wildlife program budgets to fund new F&W long-term funding agreements.
  - Budget carryover for BPA's Energy Efficiency and Fish and Wildlife program from the prior fiscal year.
- Transmission
  - Increased budgets to fund higher personnel costs and additional critical contracted work across various programs to grow BPA's Transmission system to meet increasing demand.

# Q1 Forecast: Power and Transmission Net Revenue Crosswalks

Presenter: Karlee Manary, Pablo Zepeda-Martinez

# FY25 FORECAST: POWER NET REVENUE

# QBRTW ANALYSIS: POWER NET REVENUE CROSSWALK

## The Q1 forecast for Operating Revenues **increased \$98M** from target primarily due to the following:

- Higher gross sales mainly due to higher trading floor sales driven by higher prices in Q1. U.S Treasury credits from the 4h10c credit also drive this increase due to higher predicted power purchases.
- These increases are partially offset by:
  - Decreases in generation Inputs forecast largely driven by resource additions moving out to FY26. In addition, lower-than-normal hydro conditions were also factored in at Q1 and the lower forecasted generation also decreased the Operating Reserves requirement.
- Additionally, the \$23.6M Slice True-up forecast is a charge to customers primarily due to higher budgets than rate case and increased U.S. Treasury credits.

## The Q1 forecast for Non-IPR Program Expenses **increased \$191M** from target mainly due to the following:

- Increase in power purchase expense mainly due to dry conditions leading to an increase purchases, particularly in December through February.

# FY25 FORECAST: TRANSMISSION NET REVENUE

# QBRTW ANALYSIS: TRANSMISSION NET REVENUE CROSSWALK

**The Q1 forecast for Non-IPR Program Expenses increased \$6M from Target primarily due to the following:**

- Increase in net Interest expense and other income primarily driven by increased interest expense on federal debt because of greater borrowing from US Treasury along with slightly higher interest rates.
- Partially offset by:
  - Lower amortization expense driven by the full amortization of the I5 Regulatory Asset.
  - Decrease in the Commercial Activities Non-IPR program primarily driven by reduced ancillary service payments.

**The Q1 forecast for Operating Revenues decreased \$16M primarily due to the following:**

- Decrease in Sales driven primarily by:
  - Lower Point-to-Point Long-Term revenues due to Transmission Service Request (TSR) offers being deferred by customers due to Generator Interconnection (GI) queue response timelines, project energization dates and offtake agreements not perfectly aligning.
  - Lower Network load due to loads not growing as quickly as forecasted in the Target.
  - Lower Scheduling, System Control & Dispatch, Operating Reserves and Frequency Response revenues due to lower Point-to-Point Long-Term and Network sales.
- Partially offset by:
  - Increase in Other Revenues driven by increased reimbursable and other revenues.
  - Increase in Inter-Business Unit Revenues primarily driven by an increase from EIM sub-allocated charges.

# RESERVES

Presenter: Darren Heim

# FY25 FORECAST RESERVES FOR RISK

- Forecast decreases in RFR for both Power and Transmission are driven by changed expectations compared to BP24 rate case (RC).
- Power key drivers:
  - RFR starting balance is ~\$130M lower than assumed in RC.
  - NR are ~\$245M lower than assumed in RC due to lower NSR and higher expenses.
- Transmission key drivers:
  - RFR starting balance is ~\$107M higher than assumed in RC.
  - NR are ~\$80M lower than assumed in RC.
  - The additional principal payment from the FY24 RDC of \$82M. This payment sets RFR back to the upper threshold, all else equal.

# FY25 Results: Agency Capital

Presenters: Gwen Resendes

# AGENCY CAPITAL CROSSWALK

This chart illustrates the adjustments made since rate case to establish the midpoint of the agency capital KPI, which is a range. The range is equal to +15% and -10% of the target midpoint. Thereby, if the Agency direct capital spend is anywhere equal to or between the boundaries, the target is green.

# QBRTW ANALYSIS: CAPITAL CROSSWALK - RATE CASE TO TARGET

## The KPI Target increased \$333M from the BP-24 Rate Case forecast primarily due to:

- \$36M decrease in Fed Hydro is driven largely by updated forecasts due to shifts in supply chain availability and long lead times for availability of personnel and materials/parts; contractor execution and slow-downs; design and scope changes for some projects, and so on. There is no one major project to point to as the root cause for the delta, rather, there are many smaller shifts up and down that result in an overall reduction of the target compared to Rate Case.
- \$20M increase in Environment and F&W. A \$17M increase is due to F&W land purchases and hatchery work planned in FY24 shifting to FY25. The additional \$3M increase is due to increased Environmental work primarily caused by increase support needed because of a larger-than-forecasted Transmission capital program.
- \$27M increase in Enterprise Services which is primarily due to a shift in schedule, as well as increased project estimates, on the Vancouver Control Center project.
- \$321M increase in Transmission due to the following:
  - Rate Case included a 10% lapse that was based on previous FY's under execution; however, Transmission's unexpired SAMP forecast was \$43m higher.
  - The additional delta of \$278m primarily includes multiple evolving grid projects as well as higher expected expenditures for additional work on Critical Infrastructure Components not previously included in rate case.

# FY25 FORECAST: ENTERPRISE SERVICES CAPITAL

## Enterprise Services Capital Waterfall

● Increase ● Decrease ● Total

The Enterprise Services capital expenditure KPI target is a range. The range is equal to +15% and -10% of the target midpoint. If Enterprise Services direct capital spend is equal to or between the boundaries, the target is green.

# QBRTW ANALYSIS: ENTERPRISE SERVICES

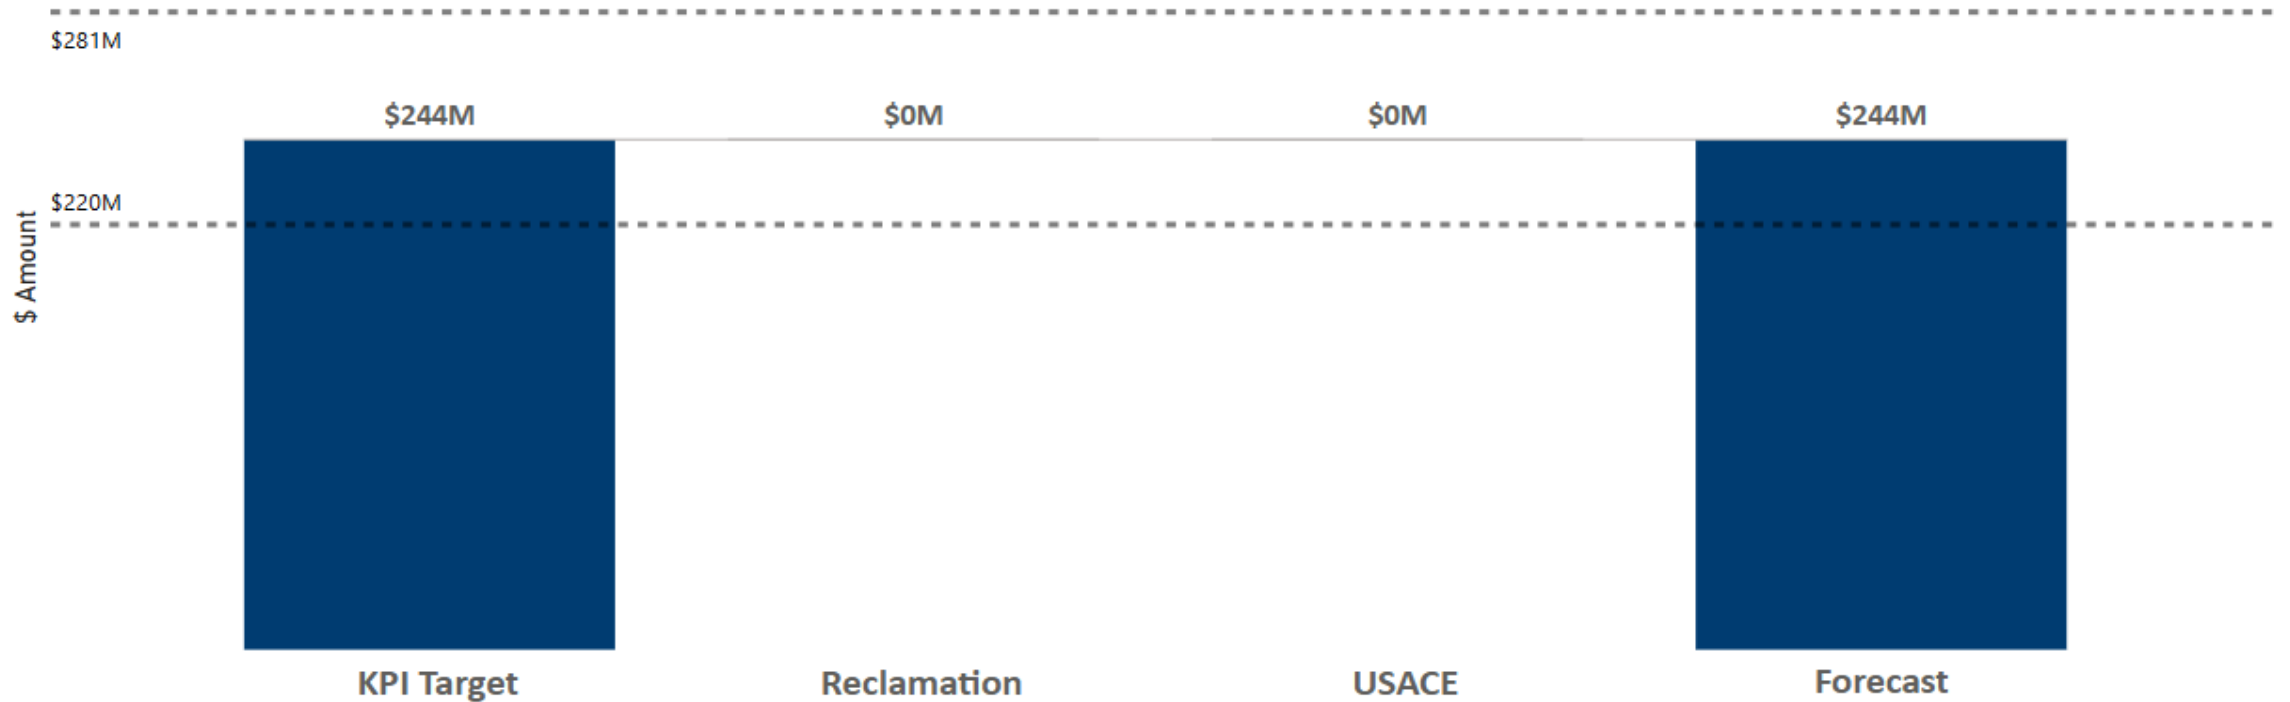

**The Q1 forecast for Enterprise Services direct capital increased by \$3 million from the Target midpoint as follows:**

- Security increase by \$5 million above their Target. This was primarily due to increased estimates on the Allston project that were updated after SOY/Target was completed.
- Facilities decreased \$1 million below their Target. This was primarily due updated estimates and vendor forecasts on multiple projects.
- The \$1 million delta is due to rounding.

# FY25 FORECAST: FED HYDRO CAPITAL

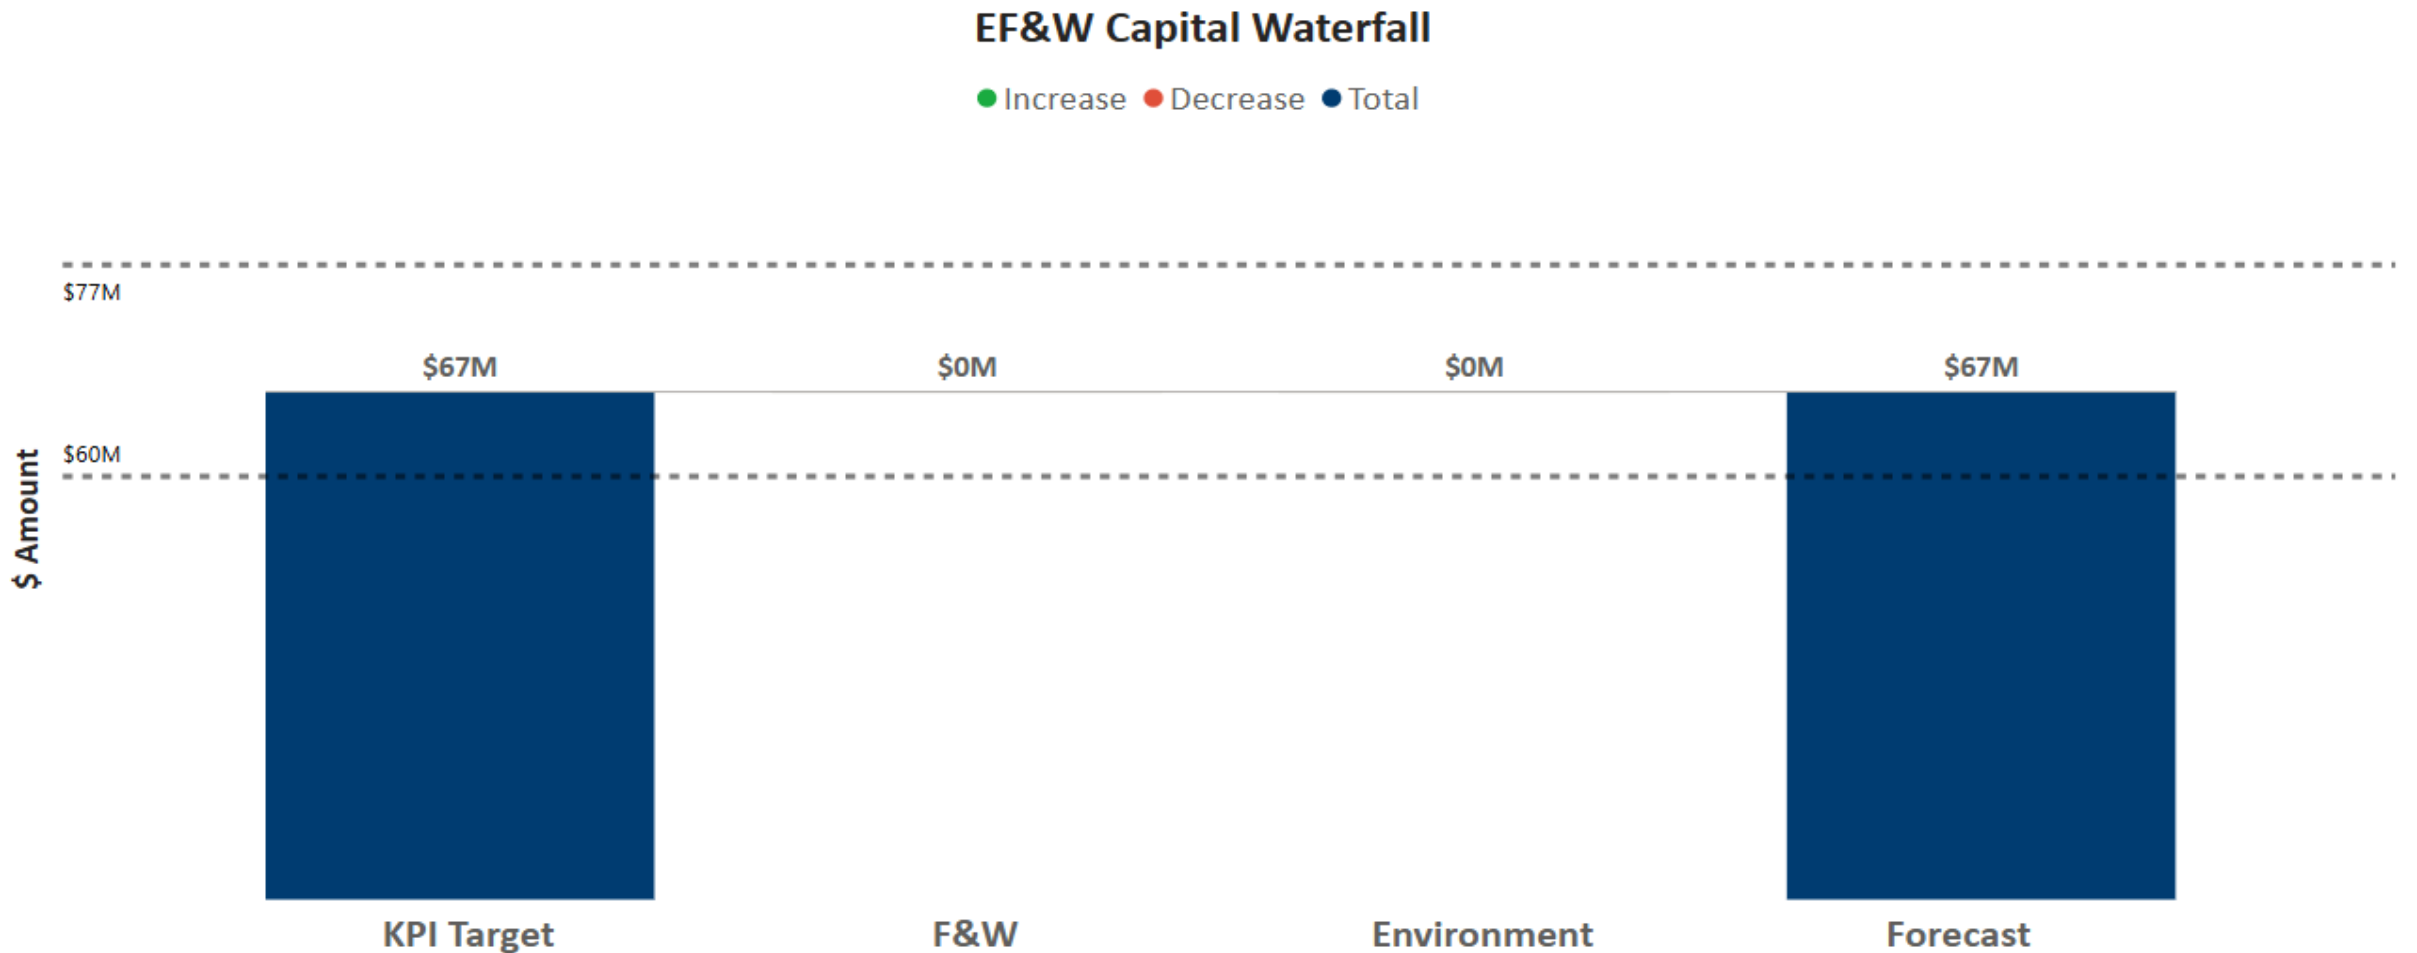

## Fed Hydro Capital Waterfall

● Increase ● Decrease ● Total

The Fed Hydro capital expenditure KPI target is a range. The range is equal to +15% and -10% of the target midpoint.  
If the Fed Hydro direct capital spend is equal to or between the boundaries, the target is green.

# FY25 FORECAST: EF&W CAPITAL

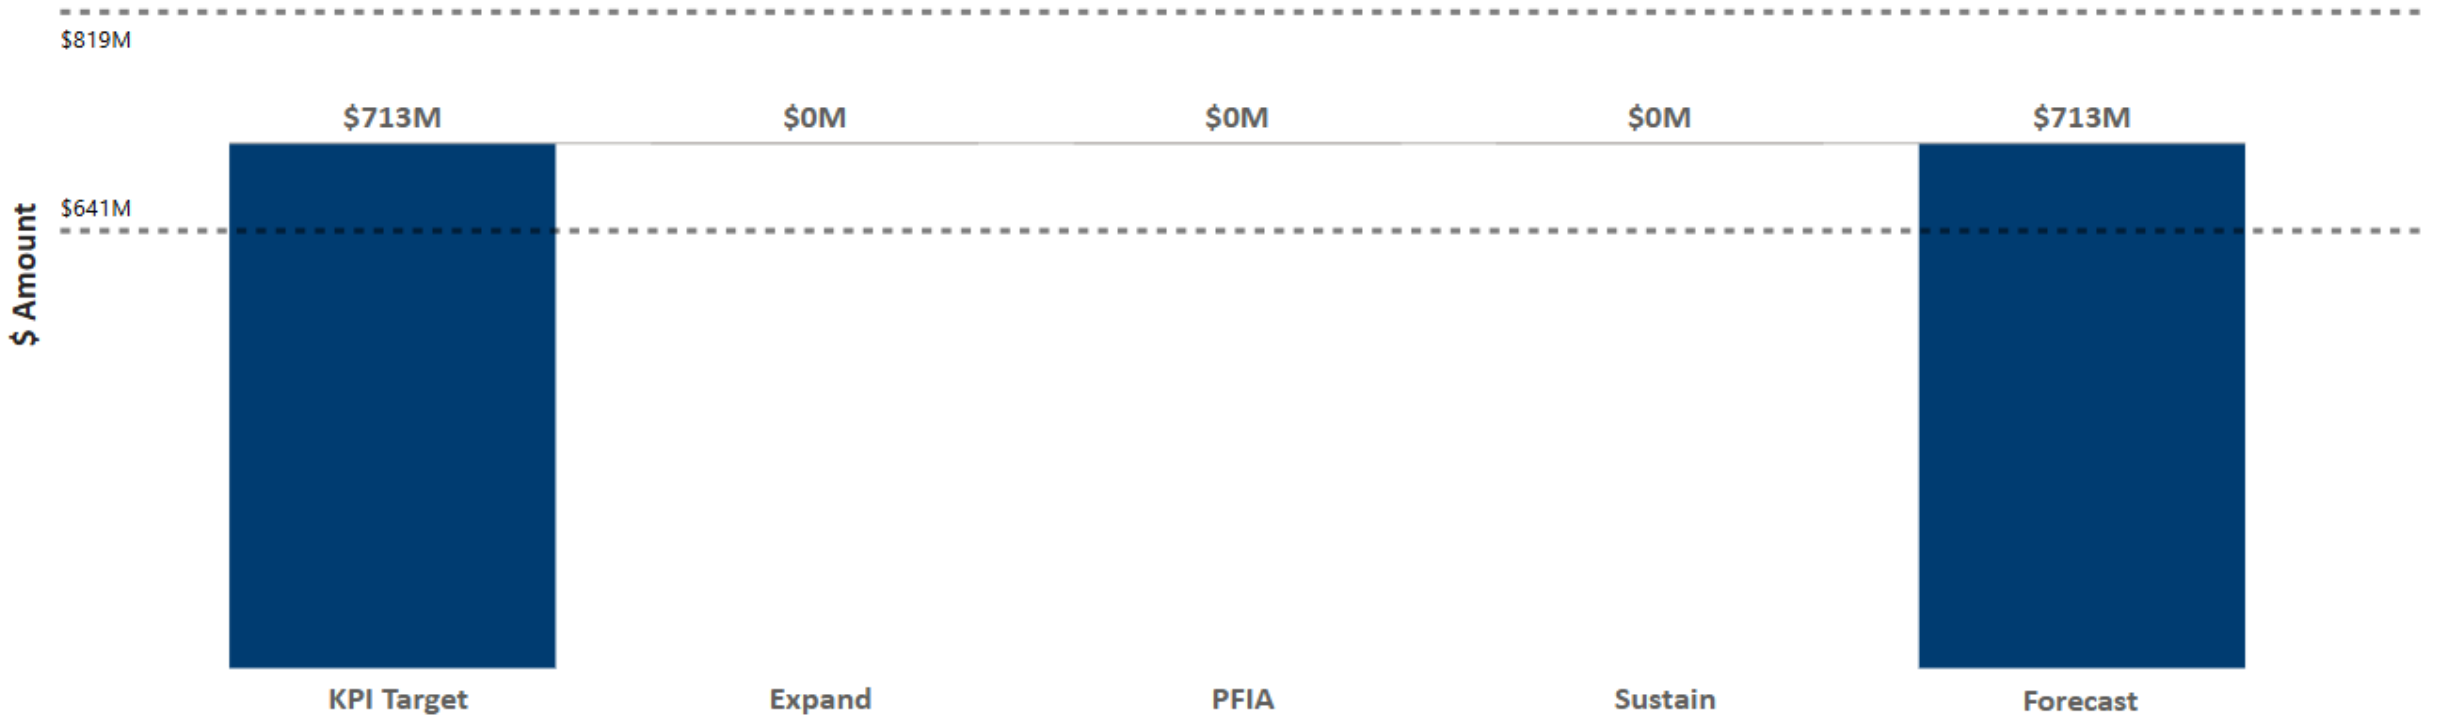

EF&W does not have its own capital expenditure target, but does roll up to the Agency capital KPI target. The range is equal to +15% and -10% of the target midpoint and is displayed to support tracking capital execution and how these expenditures could impact the Agency KPI target.

# FY25 FORECAST: TRANSMISSION CAPITAL

## Transmission Capital Waterfall

● Increase ● Decrease ● Total

The Transmission capital expenditure KPI target is a range. The range is equal to +15% and -10% of the target midpoint. If Transmission direct capital spend is equal to or between the boundaries, the target is green.

# FEDERAL HYDRO CAPITAL METRICS

Presenter: Wayne Todd

# FED HYDRO CAPITAL MILESTONES

## Key Takeaway:

Q1 Target not met. Projects delayed until later this FY but still forecasted to be completed and count toward annual target. EOY target on track.

# FED HYDRO CAPITAL PROJECT MILESTONES

|                         |   |                               |           |

| John Day                | <a href="#">JDA HVAC System Upgrade</a>                                       | Award Contract                | 16-Jun-25 |
| Little Goose            | <a href="#">LGS Turbine Intake Gate Hydraulic System Upgrade</a>              | Complete Design               | 30-Jun-25 |

## Key Takeaway:

Design Completion, Awarded Contracts, and Construction milestones for projects over \$10 million in direct funded capital costs are tracked toward the milestone target.

# FED HYDRO CAPITAL SPEND

**FY25 Key Performance Indicators**

IPR: \$276 million  
 SOY Forecast: \$244 million  
 Target Range: \$220-\$280 million

**Key Takeaway:** Capital expenditures are on track through Q1.

# FED HYDRO CAPITAL SUSTAIN VS EXPAND

**Key Takeaway:** The two expansion projects in the portfolio, Libby Unit 6 and Dworshak Unit 4 have limited expenditures in FY25.

# FED HYDRO CAPITAL FORECAST VARIANCE

**Key Takeaway:** Monthly variances occur but on aggregate we are on track with forecasted expenditures.

# TRANSMISSION SERVICES CAPITAL METRICS

Presenters: Jeff Cook and Mike Miller

### Asset Condition by Health

PSC: Power System Control, SPC: System Protection Control, Sub: Substation, TLM: Trans Line Maintenance

Transmission’s health scoring methodology is most mature for substations and some lines assets, or about 40% of the assets included in Transmission’s sustain program.

# ASSET MANAGEMENT METRIC MATURITY

- BPA Transmission has been developing models of program value using risk-based factors applied to multiple asset programs.
- In parallel, we are also creating metrics to communicate model inputs and outputs.
  - Metrics could include risk-weighted Benefit Cost Ratios for value comparison between asset or project investments. BCRs could inform business cases and other capital decisions.
- These models and metrics rely on data quality and governance.
- In FY25, we are focused on the maturation of the models, metrics, data quality and governance. We will provide additional detail in future QBRs.

# CUSTOMER DURATION METRIC

**Small Generation Interconnection projects:** Projects with an aggregation of generators, whose single or combined generating capacity is > than 0.2MW and = to or < 20MW

Includes LGI, LLI, SGI projects with a Queue date on or after 01/01/2015

Optimal performance is below the lines, which denote the target ceiling levels

**Large Generation Interconnection Projects:** Projects with an aggregation of generators, whose single or combined generating capacity is greater than 20MW

\* Completed Projects Only

**Line and Load Interconnection Projects:** Projects can be a customer owned line terminated at a BPA facility, a tap of a BPA owned line or other plans of service

# CUSTOMER DURATION METRIC (NEW)

**FAS Study Completion by Year**

**PCM Process | FAS with CDD (48 Projects)**

**Primary Capacity Model**  
(Internal Scoping Resources)

Includes LGI, LLI, SGI projects with a Queue date on or after 01/01/2017

Optimal performance is below the lines, which denote the target ceiling levels

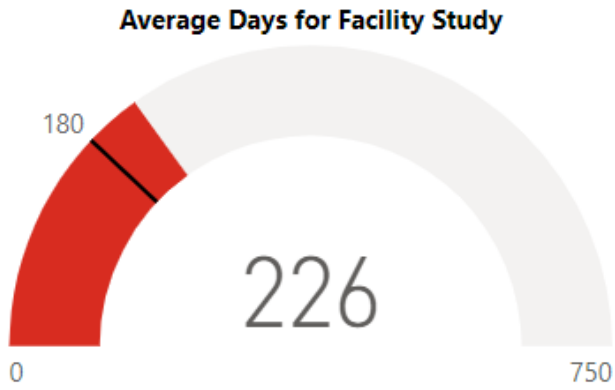

Completed Projects Only

Does not include the time projects were waiting for Scoping Resources prior to New Process starting

**FAS Study Completion by Year**

**ECM Process | FAS/Scoping No CDD (40 Projects)**

**Engineering Capacity Model**  
(Internal Consulting Resources)

# PRIMARY VS SECONDARY CAPACITY THROUGHPUT

## Transmission as of FY25 Q1:

# CAPITAL ASSETS PLANNED VS COMPLETED

## Transmission as of FY25 Q1

### Key Takeaway:

Not On Track: For end of Q1 we will report red due to completed Category A assets only being 58% of target and completed Category B assets only being at 22% of target. Category B assets were due to the timing of the completion of Franklin Munro Fiber. Category A units were pushed out due to internal resource constraints, contractor crew availability and outage constraints.

# WORK PLAN COMPLETE

## Transmission as of FY25 Q1:

### FY25 Capital Work Plan Complete Project Milestones

| Qtr | Priority Projects  | Target Milestones                                | Model | On Track |
|-----|--|--|-------|----------|
| Q1  | P05468, Big Eddy-Chemawa-1 500kV Line Rebuild TSEP 2022 (EGP1)   | Award OC Scoping Contract in Q1                  | SCM   | Complete |
| Q2  | P04342, L0482 Longhorn 500/230kV Substation  | Initial Energization                             | SCM   | Yes      |
| Q3  | P02364 MCNARY-PATERSON TAP 115KV Line that includes a new 115KV bay and 30 miles of transmission line serving Customer Benton PUD            | Complete Construction in FY25                    | PCM   | Yes      |
| Q3  | P02230 WENDSON SUB Control House replacement, yard expansion, new bus-tie breaker, new disconnects, station service and ground grid upgrades | Complete Construction in FY25                    | PCM   | Yes      |
| Q3  | P05580, L0510 Six Mile Canyon 500kV/230kV Substation (EGP – Not Tier 1)  | Partial design complete in Q3                    | SCM   | Yes      |
| Q3  | P03890 Vancouver Control Center  | Construction start for Vancouver Control Center  | PDB   | Yes      |
| Q3  | P02307 DATS Technology Project   | Design Start for Munro CC, Covington & Franklin. | PCM   | Yes      |
| Q3  | P00837 Benton-Scootenev #1 Transmission Line Rebuild   | Phase 2 Line Construction complete               | PCM   | Yes      |
| Q3  | P01361 New 230kV Midway to Ashe Tap  | Energize new line                                | PCM   | Yes      |
| Q4  | P04691 WEBBER CANYON new 500KV substation facility with 5 new bays in support of the South of Tri-Cities Reinforcement Project               | Complete Design in FY25                          | PCM   | Yes      |
| Q4  | P02259 FLATHEAD SUB add 3 new bays and bus sectionalizing breaker (WO's 484370, 484371 & 484375)   | Complete Construction in FY25                    | PCM   | Yes      |
| Q4  | P05847, L0543 Bonanza Substation (EGP – Not Tier 1)  | Complete Scoping by the OC in Q4                 | SCM   | Yes      |

#### Key Takeaway:

On Track

# CAPITAL SPEND

**Key Takeaway:** On Track

# BPA EIM Metrics FY25 Q1

Presenters:

Matt Germer

Mariano Mezzatesta

Kelii Haraguchi

# Phase 1 Metrics

**Phase 1 metrics have been reported since November 2022**

1. Unspecified purchases and sales to California
2. EIM transfer limits and use
3. Resource Sufficiency (RS) balancing tests and pass rates

# Phase 2 Metrics

## **Phase 2 metrics will be reported by BP-26**

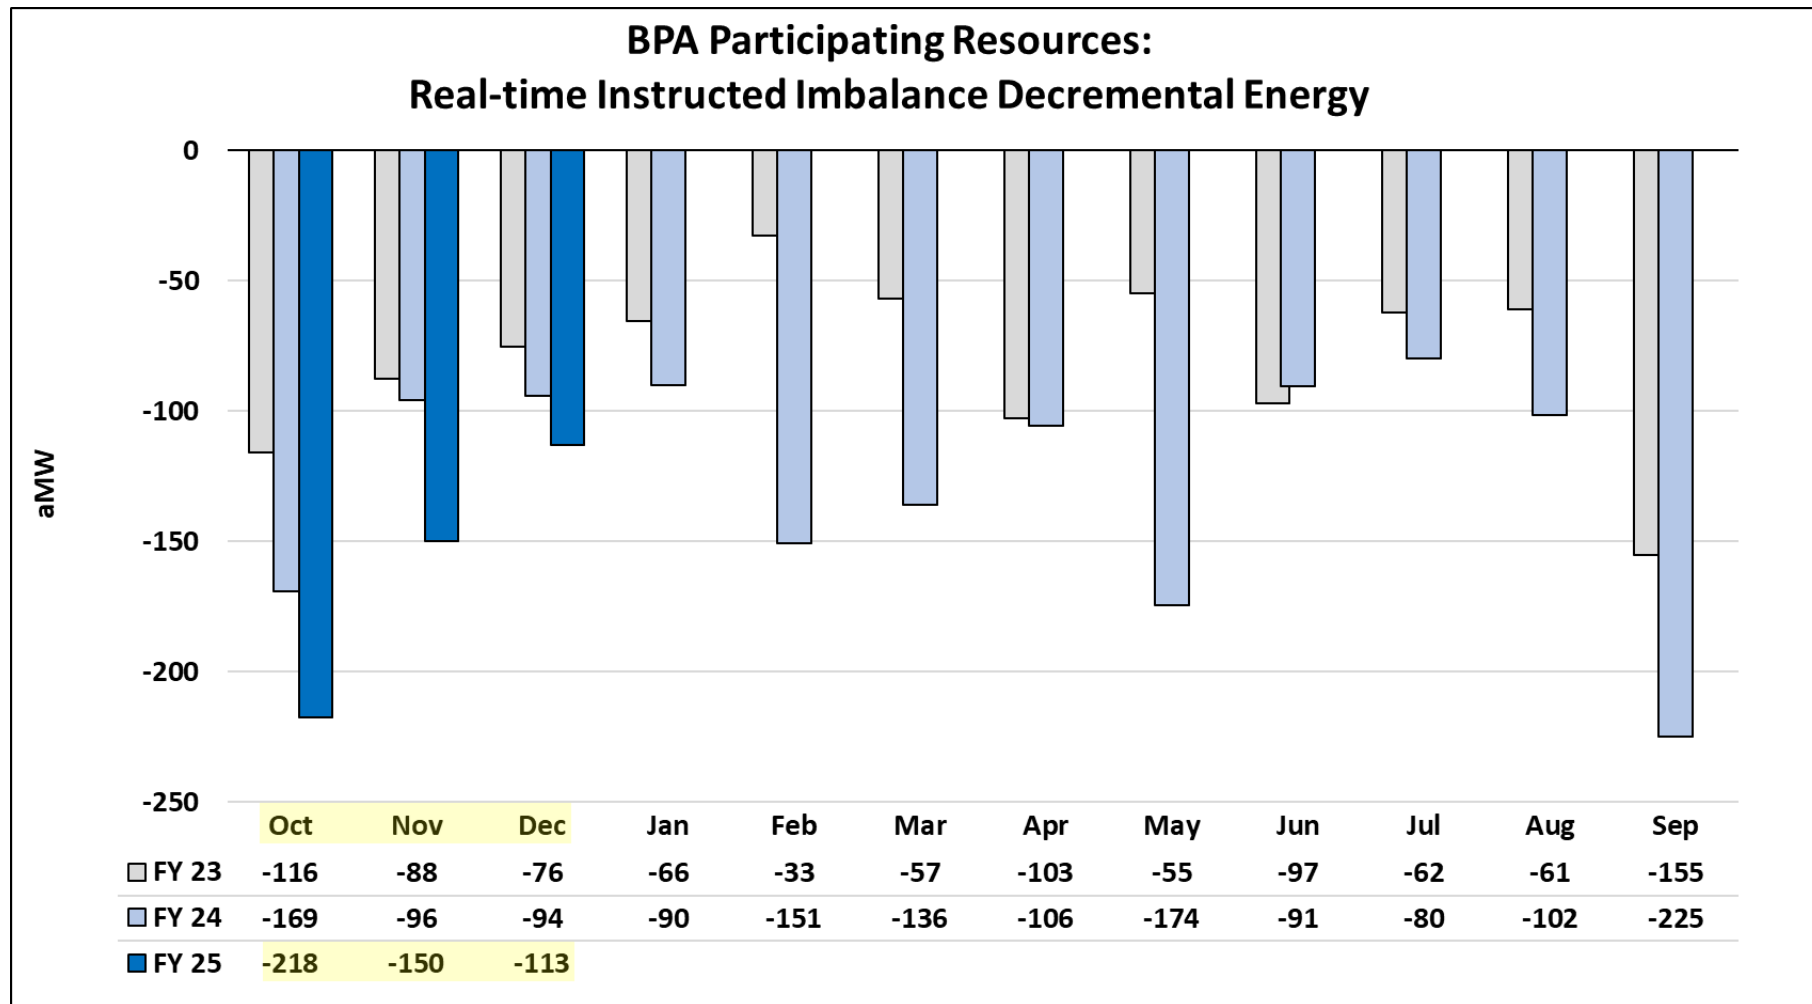

1. Charge code allocations
2. Transmission donations and usage
3. EIM impacts to BPA's system emission rate

# Unspecified purchases and sales to California

# Unspecified purchases

- **FY 25 Q1 (Oct-Dec): -160 aMW**, which compares to -120 aMW (FY 24 Q1) and -90 aMW (FY 23 Q1)

# Sales to California

- **FY 25 Q1 (Oct-Dec): 45 aMW**, which compares to 5 aMW (FY 24 Q1) and 20 aMW (FY 23 Q1)
- The average GHG Premium was \$16.7/MWh and the GHG Cost was -\$0.6/MWh

# Transfer limits and use

# EIM Transfer Limits: Q2 2024 – Q1 2025

- Intra-day shape in Q1 2025 is consistent with previous quarters – less donation in morning and evening peaks; more donation in LLH
- **Oct 2024** saw a month-on-month increase in both directions compared to Sep 2024, which itself showed a month-on-month increase. Donations moderated in November and December.

# EIM Gross Transfer: Q2 2024 – Q1 2025

- Gross imports surpass gross exports, on average, in most hours – BPA continues to be a net importer.
- **Oct 2024** mimicked Sep 2024 with relatively large gross import quantities. Gross imports moderated in the other months of Q1 2025.
- Shift to net exporting in evening peak hours of **Dec 2024**.

# EIM Net Transfer: Q2 2024 – Q1 2025

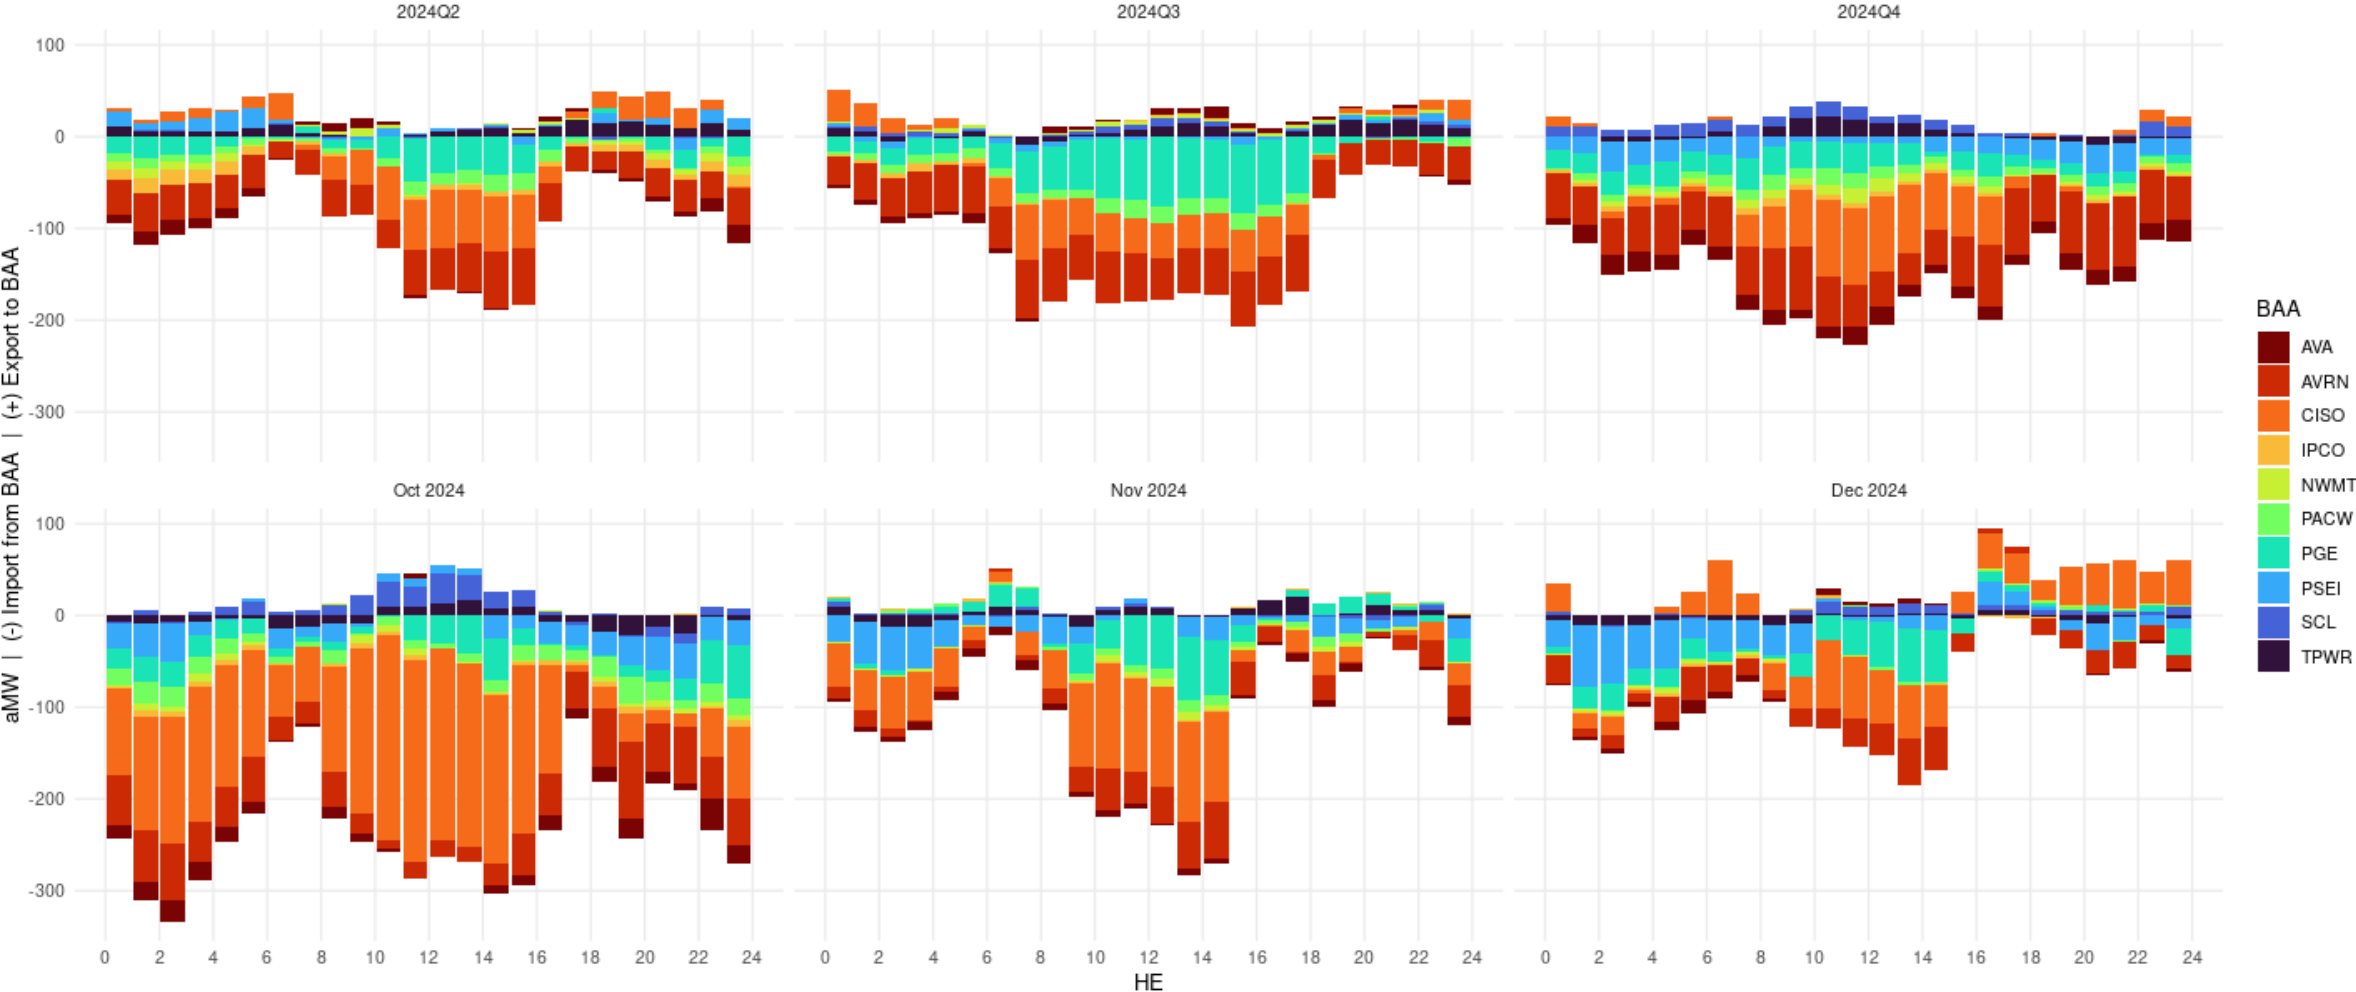

- Gross imports surpass gross exports, on average, in most hours – BPA continues to be a net importer.
- **Oct 2024** mimicked Sep 2024 with relatively large gross import quantities. Gross imports moderated in the other months of Q1 2025.
- Shift to net exporting in evening peak hours of **Dec 2024**.

# EIM Net Transfer by BAA: Q2 2024 – Q1 2025

## Average Net Transfer with BPAT

by BAA, Period, Hour Ending

# EIM Utilization of Transfer Limits: Q2 2024 – Q1 2025

- Average import utilization declined in Q1 in most midday hours, but remained relatively strong
- General shift in the evening peak featuring reduced import utilization and/or increased export utilization

# Frequency of binding EIM transfers: Q2 2024 – Q1 2025

- Generally more binding incidence in the import direction across all periods
- Binding incidence was modest in most hours compared to the previous two quarters

*Note: Transfers and limits include both static and dynamic transmission. Binding incidence flagged anytime gross transfer reaches gross import limit or gross export limit.*

# Resource sufficiency (RS) tests and pass rates

# Summary Resource Sufficiency Results

- During FY2025 Q1, BPA passed all the RS tests, on average, more than 99% of the time

# Balancing Test Results

- The Balancing Test evaluates whether the BAA scheduled within +/-1% of the CAISO area load forecast
- A failure means the BAA scheduled outside of +/-1% of the CAISO's area load forecast
- A failure does not mean the BAA necessarily incurred an Over/Under scheduling penalty

## Percent of hours passed/failed

| <b>Balancing Test</b> | <b>Oct</b> | <b>Nov</b> | <b>Dec</b> | <b>Mean</b> |
|-----------------------|------------|------------|------------|-------------|
| <b>Failed Over</b>    | 0.00%      | 0.14%      | 0.13%      | 0.09%       |
| <b>Failed Under</b>   | 0.00%      | 0.14%      | 0.13%      | 0.09%       |
| <b>Passed</b>         | 100.00%    | 99.72%     | 99.74%     | 99.82%      |

# Capacity Test Over Results

- The Capacity Test Over evaluates whether the BAA had sufficient upward bid range to meet the upward 15-min load imbalance
- The over requirement is calculated as the upward imbalance between the BAA's hourly load base schedule and the 15-min CAISO area load forecast

Percent of 15 minute intervals passed/failed

| <b>Capacity Test Over</b> | <b>Oct</b> | <b>Nov</b> | <b>Dec</b> | <b>Mean</b> |
|---------------------------|------------|------------|------------|-------------|
| <b>Failed</b>             | 0.00%      | 0.00%      | 0.00%      | 0.00%       |
| <b>Passed</b>             | 100.00%    | 100.00%    | 100.00%    | 100.00%     |

# Capacity Test Under Results

- The Capacity Test Under evaluates whether the BAA had sufficient downward bid range to meet the downward 15-min load imbalance
- The under requirement is calculated as the downward imbalance between BAA's hourly load base schedule and the 15-min CAISO area load forecast

Percent of 15 minute intervals passed/failed

| <b>Capacity Test Under</b> | <b>Oct</b> | <b>Nov</b> | <b>Dec</b> | <b>Mean</b> |
|----------------------------|------------|------------|------------|-------------|
| <b>Failed</b>              | 0.00%      | 0.00%      | 0.10%      | 0.03%       |

# Western Resource Adequacy Program (WRAP) Update

Presenter:

Matt Hayes

February 13, 2025

# Agenda

- What's Happening in WRAP
  - WPP Implementation Plan
  - 2025 PRC Workplan (CRF)
  - WPP/WRAP Public Meetings/Workshops
- BPA Active Work with WRAP
  - Participation
  - BPA Technical Solution

---

# What's Happening in WRAP

# Western Power Pool WRAP Implementation Plan

## WRAP IMPLEMENTATION

# Western Power Pool WRAP Implementation Plan

## Transition Period

Summer 25 through Winter 28-29

### Targeting Binding Program With Revised Transition Provisions

Modified Excused Transition Deficits and Cone Charge Deductions

### Binding Program

**Winter 27-28**  
and all seasons following\*

*\*Revised Transition Provisions until Winter 28-29*

# WRAP CRF Workplan

- WPP Received member submitted program change request forms (CRF) through the end of December 2024
  - These represented requested changes to the program that require either BPM or tariff changes
- The Program Review Committee (PRC) met January 23<sup>rd</sup> to prioritize submitted CRFs
  - Draft Work Plan will be released for a 30-day public comment period
  - Work Plan is scheduled to start July 1, 2025
- Creation of the Work Plan signals the next step in the full implementation of WRAP Governance process, moving into the formal process of making updates to an existing program.

# WPP/WRAP Public Meetings/Workshops

- Both the Program Review Committee (PRC) and the Resource Adequacy Participant Committee (RAPC) will continue to meet throughout 2025 to:
  - PRC will Finalize and execute a CRF workplan for 2025
    - Establish Task Forces as needed for each CRF
    - Result of reach CRF would be proposed edits to BPM and/or Tariff to be submitted through public process for approval by PRC, RAPC, and the BOD
  - Continue work to prepare the program for the revised transition to binding operations
    - PRC Information and meeting schedule
    - PRC 2025 Workplan Development CRF Compilation
    - RAPC Information and meeting schedule
- General WPP/WRAP Events (WPP)
  - All WPP Events

# BPA Active Work with WRAP

# BPA Active Work with WRAP

## WRAP participant work:

- Resource Adequacy Participants Committee (RAPC) – reviewing and continuing development and design getting to full binding seasons
- Forward Showing Work Group – engaged in activities and discussion for FS submittals
- Ops Work Group – Submitting operations data for nonbinding winter season
- Program Review Committee (PRC) – participating member, actively reviewing materials (including prioritizing CRFs), and will be active member of Work Plan task forces
- Other ongoing workgroups
  - Summer 2025 cure period is open from January 1-February 28<sup>th</sup> – BPA is actively reviewing identified deficiencies in Forward Showing and making updates/corrections for those that can be updated at this time
  - 2025 Advanced Assessment submittals are under development – due March 3
  - Winter 2025/26 Forward Showing data submittals are under development – due March 31

# BPA Active Work with WRAP

## Technical Solution for WRAP Participation:

- BPA continues to refine the now live WRAP Operations data submittal system
- Work is ongoing to identify enhancements that are needed to support BPA's binding operations

# Questions

- More information on BPA's participation in the Western Resource Adequacy Program can be found at

[Western Resource Adequacy Program - Bonneville Power Administration \(bpa.gov\)](https://www.bpa.gov)

- For more information on the Western Power Pool's Western Resource Adequacy Program at

<https://www.westernpowerpool.org/>

---

# APPENDIX

# Final Closeout Letter Commitments

- On December 16, 2022, BPA issued its decision to join Phase 3B. In the WRAP Final Closeout Letter, BPA committed to:
  - sharing its stakeholder engagement plan for Phase 3B participation (goal is within the first half of 2023);
  - providing program implementation updates that impact BPA and its customers; and
  - continue working with customers on outstanding items raised in comments related to WRAP implementation.

# Stakeholder Engagement Plan

- Provide transparency of program design updates and information that may impact BPA and its customers, outcomes from BPA's participation in non-binding forward showing and operations program, and resolving BPA and customer raised issues in the Final Closeout Letter
- Engagement will be consistent with external WRAP engagement outside of BPA's process
- Pursue effective and efficient two-way communication between BPA and customers, stakeholders, and external interested parties
- Engage on a predictable, standardized cadence provided there is adequate content or relevant information to discuss
- Ensure engagement opportunities occur sufficiently to inform interested parties based on program timelines and information availability and applicability

# Stakeholder Engagement Plan cont.

- Engagement with customers and stakeholders will consist of:
  - Public meetings with a minimum of 4 meetings, preferably through the QBR Technical Workshops
  - Short-term Issue-focused workshops, as needed
  - Customer-impacted meetings focused by topic, upon request
- BPA proposes to host meetings through the completion of BPA's first binding season (winter 2027-2028). BPA will work with customers to reevaluate its engagement plan and the need for its proposed meeting schedule on an annual basis through its first binding season
- Meetings will focus on BPA's participation, the development of the business practice manuals, and updates to the WRAP policies as determined by the WRAP project schedule

# Stakeholder Engagement Plan cont.

## Public meetings

- Regularly scheduled meetings four times per year, utilizing a combination of stand-alone workshops and preferably the Quarterly Business Review (QBR) Technical Workshops
  - Typically February, May, August, and November
- Provide program design updates and information that may include any topics relevant to customer and stakeholder questions on BPA's WRAP participation

## Issue – focused workshops

- Workshops will be scheduled based on information availability from WRAP and applicability
- Will address topics raised in comments related to WRAP implementation

## Customer-impacted meetings focused by topic

- BPA will continue to meet with individual or groups of customers, upon request, to focus on their unique questions or needs.
- To the extent that there is a nexus between the implications of the WRAP and other issues of focus for customers, BPA will coordinate discussion with other BPA meetings or initiatives
- Resolution timing of customer identified items may depend on information availability from WRAP

# Stakeholder Engagement Topics

- Topics raised in comments related to WRAP implementation, including:
  - Considerations related to BPA's binding season (Winter 2027-2028)
    - The availability of transmission between loads in the SWEDE region and the FCRPS create risks that may create costs in the Forward Showing Program,
    - the uncertainty in details and requirements for the Operations Program,
    - identifying Bonneville system updates and business processes to support participation in the binding program, and
    - alignment with the timing for joining emerging regional markets
  - Treatment of NLSLs and AHWM loads related to BPA's WRAP participation
    - WRAP load exclusion process update / BPA load exclusion process between BPA and customers
  - Load exclusion process for AHWM loads caused by a single large consumer load and served solely with non-federal resources
  - Resource Adequacy Incentive rates
- Updates on Business Practice Manual development
  - Future BPM on BPA's statutory preference obligations
- Updates on Forward Showing and Operations Program development

# Final Closeout Letter Commitments

- On December 16, 2022, BPA issued its decision to join Phase 3B. In the WRAP Final Closeout Letter, BPA committed to:

# Fish and Wildlife RDC & Agreements Reporting

# FY22 RDC F&W \$50M Set Aside - Application

- Based on FY22 financial results, \$50M of the Rates Distribution Clause (RDC) was designated to spend on certain non-recurring maintenance needs of existing Fish & Wildlife mitigation assets that (i) BPA anticipates would otherwise need to be addressed during future rate periods and (ii) will result in avoidance of those costs in future rate periods.
  - This \$50M was split evenly between the Fish and Wildlife and Lower Snake programs.
  - The fund is being spent over several years (through FY27) and must be separated from current year rate-funded spending in the aforementioned programs.
  - To track these costs and isolate them from rate funded projects, we created two non-IPR projects that can be seen in our detailed reports found on BPA's Quarterly Reports Portal.

# Locating F&W RDC Report

The screenshot shows the Bonneville Power Administration website. The top navigation bar includes 'Energy & Services', 'Environment & Land', 'Learn & Participate', and 'About & Careers'. A dropdown menu is open under 'About & Careers', showing 'Newsroom', 'Finance', 'Who We Are', and 'Careers'. The main content area is titled 'Quarterly Reports' and includes a description: 'BPA's Quarterly Financial Report is prepared by BPA's Finance organization and presents current quarter and fiscal year-to-date unaudited financial information, including financial position as of the reporting date.' Below this is a section for 'Quarterly Reports - Fiscal Year 2025' with a link to 'First Quarter'. There is also a section for 'Older Quarterly Reports' with expandable boxes for 'Fiscal Year 2024' and 'Fiscal Year 2023'. The bottom section is 'Quarterly Financial Packages - Fiscal Year 2024', with a description and links for 'First Quarter', 'Second Quarter', 'Third Quarter', and 'Fourth Quarter'.

## Quarterly Reports - Bonneville Power Administration (bpa.gov)

The slide features a blue header with the text 'B O N N E V I L L E P O W E R A D M I N I S T R A T I O N' and a background image of water. The main content is on a red background, reading 'Q1 FY 2025 Quarterly Financial Package As of December 31, 2024'. The Bonneville Power Administration logo is in the bottom right corner. Below the slide is a grid of navigation tabs: '< > Title 0120FY25 - Program Plan View 0120FY25 - QBR Analysis 0121FY25 - Summary POWER I.S. 0160FY25 - Detailed POWER I.S. 0064FY25 - POWER'. A red arrow points to the '0160FY25 - Detailed POWER I.S.' tab.

# FY22 RDC F&W \$50M Set Aside - Application

- Our Q1 FY25 spending was \$4M.
- Note: Based on FY23 financial results, the RDC again triggered for Power Services with \$30M of the FY23 RDC being set aside for certain F&W projects/spending. The use of these additional funds is set to begin in FY25.
