

# Quarterly Financial Report

## 2025 Second Quarter

# Q2

## Management's Discussion and Analysis

### Profile

The Bonneville Power Administration (BPA) is a nonprofit federal power marketing administration based in the Pacific Northwest. Although BPA is part of the U.S. Department of Energy, it is self-funding and covers its costs by selling its products and services. BPA markets wholesale electrical power from 31 federal hydroelectric projects in the Northwest, one nonfederal nuclear plant and several small nonfederal power plants. The dams are operated by the U.S. Army Corps of Engineers (USACE) and the Bureau of Reclamation (Reclamation). The nonfederal nuclear plant, Columbia Generating Station, is owned and operated by Energy Northwest, a joint operating agency of the state of Washington. BPA provides about 32% of the electric power generated in the Northwest.

BPA also operates and maintains approximately 15,000 circuit miles of high-voltage transmission in its service territory. BPA's territory includes Idaho, Oregon, Washington, western Montana and small parts of eastern Montana, California, Nevada, Utah and Wyoming.

BPA promotes energy efficiency, renewable resources and new technologies that improve its ability to deliver on its mission. To mitigate the impacts of the federal dams, BPA implements a fish and wildlife program that includes working with its partners to make the federal dams safer for fish passage.

BPA is committed to public service and seeks to make its decisions in a manner that provides opportunities for input from all stakeholders. In its vision statement, BPA dedicates itself to providing high system reliability, low rates consistent with sound business principles, environmental stewardship and accountability.

### General

The Federal Columbia River Power System (FCRPS) financial statements combine the accounts of BPA with the accounts of the Pacific Northwest generating facilities of the USACE and Reclamation. The FCRPS financial statements also include the operations and maintenance costs of the U.S. Fish and Wildlife Service for the Lower Snake River Compensation Plan facilities. Consolidated with BPA is a variable interest entity (VIE) of which BPA is the primary beneficiary, and from which BPA leases certain transmission facilities. The FCRPS fiscal year is from October 1 to September 30.

### Use of Estimates and Forward-Looking Information

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of

contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

This Management's Discussion and Analysis (MD&A) is unaudited and may contain statements which, to the extent they are not recitations of historical facts, constitute "forward-looking statements." In this respect, the words "planned," "predict," "could," "estimate," "expect" and similar expressions are intended to identify forward-looking statements. A number of important factors affecting FCRPS business and financial results could cause actual results to differ materially from those stated in forward-looking statements due to factors such as changes in economic, industry, political and business conditions; changes in laws, regulations and policies and the application of the laws; and changes in climate, weather, hydroelectric conditions and power services supply and demand. BPA does not plan to issue updates or revisions to the forward-looking statements.

## Rates and the Effect of Regulations

### *Rates for Fiscal Years 2024-2025*

To establish rates for fiscal years 2024 and 2025, BPA concluded the BP-24 rate proceeding in July 2023 by releasing the Administrator's Final Record of Decision and Final Proposal. Rates went into effect on Oct. 1, 2023, and will be effective through Sept. 30, 2025. The Federal Energy Regulatory Commission's (FERC) practice is to grant approval of BPA's rates on an interim basis at the beginning of the rate period, pending final review. FERC granted final approval of the BP-24 Power and Transmission rates in March 2024. BPA held power and transmission rates flat when compared to the prior rate period (BP-22).

As with the 2022-2023 rate period, power and transmission rates in the BP-24 rate period also include other rate adjustment mechanisms, such as the Cost Recovery Adjustment Clause (CRAC), Financial Reserves Policy (FRP) Surcharge and Reserves Distribution Clause (RDC), which BPA employs if certain financial conditions occur. As defined in the BP-24 rate case, if business line financial reserves and agency reserves are above their respective upper thresholds, and the RDC amount is greater than \$5 million, the BPA Administrator shall consider the above-threshold financial reserves for debt reduction, incremental capital investment, rate reduction through a Dividend Distribution, distribution to customers, or any business line specific purposes determined by the BPA Administrator.

Based upon fiscal year 2024 financial results and year-end reserves for risk levels for Transmission services, a Transmission RDC occurred for application in fiscal year 2025. In December 2024, the BPA Administrator determined the entire Transmission RDC amount of \$82.8 million will be applied toward flexible debt reduction, with BPA retaining the flexibility to forego some or all of the planned debt reduction to preserve BPA's liquidity.

Based on fiscal year 2023 financial results and year-end reserves for risk levels for both Power and Transmission Services, an RDC occurred for application in fiscal year 2024. The Transmission RDC was \$130.4 million and the Power RDC was \$285.4 million. For information regarding the use of the fiscal year 2023 RDC, applied in fiscal year 2024, see the Management's Discussion and Analysis in BPA's 2024 Annual Report.

## Results of Operations

### Operating revenues

A comparison of FCRPS operating revenues follows for the six months ended March 31, 2025, and March 31, 2024:

<i>(Millions of dollars)</i>	Fiscal Year 2025	Fiscal Year 2024	Revenue Increase (Decrease)	% Change
Sales				
Consolidated sales				
Power gross sales	\$ 1,544.8	\$ 1,608.6	\$ (63.8)	(4) %
Transmission	604.1	612.1	(8.0)	(1)
Bookouts (Power)	(35.5)	(56.9)	21.4	(38)
Consolidated sales	2,113.4	2,163.8	(50.4)	(2)
Other revenues				
Power	15.8	48.3	(32.5)	(67)
Transmission	26.6	27.1	(0.5)	(2)
Other revenues	42.4	75.4	(33.0)	(44)
Sales	2,155.8	2,239.2	(83.4)	(4)
U.S. Treasury credits	98.3	226.5	(128.2)	(57)
Total operating revenues	\$ 2,254.1	\$ 2,465.7	\$ (211.6)	(9)

Total operating revenues decreased \$211.6 million when compared to the same period of fiscal year 2024. Sales of Power and Transmission Services, including other revenues and the effect of bookouts, decreased \$83.4 million.

Power Services gross sales decreased \$63.8 million.

- Surplus power sales, including revenue from derivative instruments settled with physical deliveries, decreased \$194.3 million primarily due to lower prices when compared to the same period of fiscal year 2024.
- Firm power sales increased \$130.5 million. \$43.3 million of the increase was primarily driven by more customers electing to serve load through the purchase of power at BPA Tier 2 rates in fiscal year 2025. Additionally, in fiscal year 2025 BPA will recognize no reductions to revenue related to a Power RDC. Through the second quarter of fiscal year 2024, BPA recognized a reduction to revenue of \$71.6 million, resulting in a comparative increase of \$71.6 million through the second quarter of fiscal year 2025.

Transmission sales decreased \$8 million due to offsetting increases and decreases in Transmission products. Energy Imbalance Market (EIM) revenues decreased \$44.6 million when compared to the same period of fiscal year 2024. In January 2024 the region experienced a generational cold snap which, coupled with hydroelectric power generation outages, transaction congestion and increases in energy prices, led to an increase in EIM revenues that did not repeat in fiscal year 2025. Partially offsetting this decrease was a \$17.9 million increase in point-to-point long-term revenues due to customers taking new service. The remaining \$18.5 increase was primarily driven by various increases in ancillary services, southern intertie, network integration and point-to-point short-term revenues.

Power other revenues decreased \$32.5 million primarily due to a decrease in realized gains associated with financial future trades. BPA uses financial futures contracts on energy as an operational hedge to mitigate for price volatility in the physical energy market. Financial futures contracts are settled financially and not through the delivery of power.

Bookouts are presented on a net basis in the Combined Statements of Revenues and Expenses. When sales and purchases are scheduled with the same counterparty on the same transmission path for the same hour, the power is typically booked out and not scheduled for physical delivery. The megawatt-hours that offset each other net to zero. The dollar values of these offsetting transactions reduce both sales and purchased power expense and are recorded as bookouts. Therefore, the accounting treatment for bookouts has no effect on net revenues, cash flows or margins.

U.S. Treasury credits for fish and wildlife mitigation decreased \$128.2 million when compared to the same period of fiscal year 2024. This decrease was due to lower volumes of replacement power purchases at lower market prices when compared to the second quarter of the prior fiscal year. Under the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act), BPA reduces its annual payment to the U.S. Treasury for the nonpower portion of expenditures, set at 22.3%, that BPA makes for fish and wildlife protection, mitigation and enhancement. Through the fiscal year, BPA records anticipated U.S. Treasury credits earned through the reporting period. At fiscal year-end, BPA calculates and records the annual amount of U.S. Treasury credits earned.

**Operating expenses**

A comparison of FCRPS operating expenses follows for the six months ended March 31, 2025, and March 31, 2024:

<i>(Millions of dollars)</i>	Fiscal Year 2025	Fiscal Year 2024	Expense Increase (Decrease)	% Change
Operations and maintenance	\$ 1,277.0	\$ 1,180.3	\$ 96.7	8 %
Purchased power	302.5	846.0	(543.5)	(64)
Depreciation, amortization and accretion	440.3	433.4	6.9	2
<b>Total operating expenses</b>	<b>\$ 2,019.8</b>	<b>\$ 2,459.7</b>	<b>\$ (439.9)</b>	<b>(18)</b>

Total operating expenses decreased \$439.9 million when compared to the same period of fiscal year 2024.

Operations and maintenance expense increased \$96.7 million primarily due to the following factors:

- \$53.9 million increase to Columbia Generating Station costs primarily due to fiscal year 2025 being a refueling year. Refueling occurs biennially, most recently in fiscal year 2023, and refueling and maintenance expenses are higher in refueling years.
- \$23.7 million decrease in EIM settlement charges due to the extreme cold snap experienced during January 2024 which led to large EIM expenses that did not repeat in fiscal year 2025. A portion of EIM settlement charges are sub-allocated to certain BPA transmission customers and recognized as revenue.
- \$16.4 million increase in USACE expenses due to greater amounts of work completed when compared to the same period of the prior fiscal year.

- \$15.4 million increase to conservation purchases due to an increase in work performed.
- \$10.2 million decrease in the annual settlements paid to the Confederated Tribes of the Colville Reservation and Spokane Tribe of Indians. The current year payments are based upon, in part, prior year output at Grand Coulee Dam, Power Services gross sales and the number of megawatts sold. Lower-than-average flows at Grand Coulee Dam and lower average price per megawatt in fiscal year 2024 led to a decrease in the annual payments made in fiscal year 2025.
- \$10.7 million increase to Fish and Wildlife Program expenses due to greater amounts of work performed and invoiced when compared to the same period of fiscal year 2024.
- \$9.8 million increase in third-party wheeling expenses due to increased rates in fiscal year 2024 that carried over into the second quarter of fiscal year 2025.
- \$6.6 million decrease in Lower Snake River Compensation Plan hatchery costs due to a financial system upgrade at partner agencies delaying work completion.
- \$4.8 million increase in fish and wildlife maintenance costs in connection with the fiscal year 2022 RDC decision. This increase includes amounts supporting BPA's direct fish and wildlife program and the U.S. Fish and Wildlife Service Lower Snake River Compensation Plan.
- \$4.6 million increase in the amount of reimbursable work being performed for external customers.
- \$21.6 million net increase to various other Transmission, Enterprise Services and Power program costs primarily due to increases in personnel costs.

Purchased power expense, including the effects of bookouts, decreased \$543.5 million primarily due to the following factors:

- \$542.3 million decrease in power purchases due to lower volumes of power purchased at lower market prices when compared to the same period in fiscal year 2024. Additionally, during the fiscal year 2024 cold snap, BPA was a net purchaser of power at extremely high prices, and similar conditions have not repeated in fiscal year 2025.
- \$1.2 million decrease related to water storage agreements with BC Hydro, an electric utility owned by the Province of British Columbia. Yearly fluctuations in weather and streamflows, river operations and energy markets affect Non-Treaty storage operations and ultimately impacted the amount of dollars owed to, or due from, BC Hydro. At the end of December 2024, the last remaining agreement expired, and BPA received the final amount owed of approximately \$27 million in the second quarter of fiscal year 2025.

Depreciation, amortization and accretion increased \$6.9 million primarily due to an increase in depreciation expense of \$15.6 million as a result of an increase in the amount of utility plant assets in service and the impacts of revised depreciation rates applied in March 2025. (For additional information regarding this transaction, see Other Operational Matters, Depreciation Study, in this Management's Discussion and Analysis.) Partially offsetting this increase was a decrease in amortization expense of approximately \$10.7 million. Fiscal year 2024 was the final year of amortization of the Terminated I-5 Corridor Reinforcement Project, and as such no related amortization expense has been or will be recorded in fiscal year 2025.

### **Interest expense and other income, net**

A comparison of FCRPS interest expense and other income, net, follows for the six months ended March 31, 2025, and March 31, 2024:

(Millions of dollars)

	Fiscal Year 2025	Fiscal Year 2024	Expense Increase (Decrease)	% Change
Interest expense	\$ 228.9	\$ 226.9	\$ 2.0	1 %
Irrigation assistance	6.7	—	6.7	100
Allowance for funds used during construction	(34.7)	(26.1)	(8.6)	33
Interest income	(16.3)	(29.2)	12.9	(44)
Other, net	(178.0)	(8.7)	(169.3)	1,946
Total interest expense and other income, net	\$ 6.6	\$ 162.9	\$ (156.3)	(96)

Total interest expense and other income, net, decreased \$156.3 million when compared to the same period of fiscal year 2024.

Irrigation assistance expense increased \$6.7 million when compared to the same period of fiscal year 2024. Fiscal year 2025 is the first year of quarterly expense recognition related to the annual irrigation assistance payment made to the U.S. Treasury. In fiscal year 2024, BPA only recorded irrigation assistance expense at year-end. For further information about this change, see Note 14, Commitments and Contingencies, in the fiscal year 2024 Annual Report.

Allowance for funds used during construction (AFUDC) increased \$8.6 million due to higher Construction work in progress balances and higher interest rates when compared to the same period in fiscal year 2024. For additional information on how the rates applied to AFUDC are calculated each year, see Note 1, Summary of Significant Accounting Policies, in BPA's 2024 Annual Report.

Interest income decreased \$12.9 million as a result of lower amounts of U.S. Treasury market-based special securities due to lower cash balances coupled with lower interest rates received from U.S. Treasury. These investments have original maturities of 90 days or less and are recorded as Cash and cash equivalents on the Combined Balance Sheets.

Other, net changed \$169.3 million due to a \$165.9 million gain recognized in connection with the early extinguishment of U.S. Treasury debt. (For additional information regarding this transaction, see Other Operational Matters, U.S. Treasury Debt Refinancing, in this Management's Discussion and Analysis.) A \$3.4 million increase in dividends and net realized gains received on investments held in the nonfederal nuclear decommissioning and site restoration comprises the remainder of the difference.

### **Accrued Construction work in progress**

Amounts accrued in Accounts payable and other on the Combined Balance Sheet for Construction work in progress assets were approximately \$118 million and \$132 million as of March 31, 2025, and 2024, respectively.

## Other Operational Matters

### **Grand Coulee Switchyard Asset Transfer**

In October 2024, BPA and Reclamation entered into an agreement to transfer ownership of assets at three switchyards at the Grand Coulee Dam from Reclamation to BPA. The transition of operations and maintenance of these assets will occur gradually over five years to provide the greatest level of reliability and ensure continued safety in switchyard operations. After the transition is complete, BPA expects to realize overall costs savings in annual operations and maintenance expenses, along with significant reduction in overhead costs on capital modernization projects going forward. The transaction to record the asset transfers did not affect FCRPS fiscal year 2025 net revenues. In addition, all related assets and liabilities had been reported on the fiscal year 2024 FCRPS Combined Balance Sheet, with no net FCRPS change recorded in fiscal year 2025.

### **Energy Northwest Line of Credit Activity**

In December 2024, Energy Northwest entered into a \$120 million line of credit arrangement to provide interim financing to pay for certain costs of the Columbia Generating Station. Amounts borrowed are due to be repaid on or before Dec. 16, 2026.

Of the available \$120 million, Energy Northwest has borrowed a total of \$108.5 million. In December 2024, Energy Northwest borrowed \$54.3 million to fund an advanced nuclear fuel purchase. In February 2025, Energy Northwest borrowed an additional \$54.2 million to complete the advanced nuclear fuel purchase. As a result of these transactions, BPA recorded a \$108.5 million increase to current Nonfederal debt and an accompanying increase to Nonfederal generation on the Combined Balance Sheet.

BPA management expects Energy Northwest to issue long-term bonds in spring 2025 to repay amounts borrowed for the nuclear fuel purchases under this line of credit.

### **Change in Administration**

On Jan. 20, 2025, Donald J. Trump was sworn in as President of the United States of America. On Feb. 4, 2025, Chris Wright was sworn in as the Secretary of the United States Department of Energy.

With every new Administration, national policy objectives may change and shifting political priorities could impact BPA. On Jan. 20, 2025, President Trump issued a Presidential Memorandum instituting a federal hiring freeze intended to be replaced by a long-term workforce reduction plan to be developed by the United States Office of Personnel Management (“OPM”). On Feb. 26, 2025, the United States Office of Management and Budget (“OMB”), together with OPM, released further guidance for agencies to prepare for large-scale reductions in force. BPA is working with DOE, OPM and OMB to determine how to carry out the order.

On Jan. 28, 2025, BPA employees received the “Fork in the Road” email from OPM offering a Deferred Resignation Program (“DRP”) and voluntary early retirement for those that qualify with requests to opt in required by Feb. 6, 2025. The DRP enables employees to resign effective Sept. 30, 2025 (or Dec. 31, 2025, if retiring), but be placed on administrative leave beginning as early as the first week of March until the September resignation date or December retirement date.

On March 31, 2025, the Department of Energy (DOE) instituted a second DRP with requests to opt in required by April 11, 2025. The requirements, expectations, benefits and other facets are

consistent with the DRP offered in February 2025. However, enrollment requests will be reviewed for eligibility before final decisions are made to ensure that mission-critical positions are properly staffed.

Although the DRP offered in February 2025 has impacted BPA's workforce, BPA continues to maintain reliability and perform its essential statutory responsibilities. BPA will continue to assess impacts to the workforce as a result of the DRP offered in April, but does not expect reliability and resilience of the Federal System to be affected.

Neither the initial DRP or subsequent DRP have had a material impact to BPA's net revenues or financial position as of March 31, 2025, and BPA has not accrued any additional liability related to either DRP. Those who accepted the DRP remain as BPA employees through the end of the DRP periods and receive salary payments in accordance with normal payroll procedures.

### **U.S. Treasury Debt Refinancing**

In February 2025, BPA called approximately \$408 million of long-term bonds it had previously issued to the U.S. Treasury and refinanced approximately \$242 million of long-term debt to mature on Sept. 30, 2025. As a result, BPA recognized a \$165.9 million gain to Other, net in the Combined Statements of Revenues and Expenses.

As part of its annual payment to the U.S. Treasury, BPA applies the U.S Treasury credits earned each fiscal year against various categories of payment obligations. For example, BPA may apply U.S. Treasury credits against interest expense or liabilities such as borrowings from U.S. Treasury and federal appropriations. BPA anticipates available U.S. Treasury credits will outpace federal appropriations due Sept. 30, 2025, and this debt refinancing ensures adequate obligations outstanding to apply the available U.S. Treasury credits against.

### **Depreciation Study**

In February 2025, BPA completed a depreciation study on BPA's transmission and general plant assets. BPA implemented revised depreciation rates effective March 2025 on applicable assets. The average service lives for transmission assets have remained the same at 51 years, but BPA management expects higher cost of removal and negative salvage estimates will result in higher monthly depreciation expense beginning in March 2025. As a result of the revised depreciation rates, BPA recorded additional depreciation expense of approximately \$3.6 million in March 2025.

### **Day Ahead Market Participation**

In July 2023, BPA began to engage the region in a public process to evaluate its potential participation in a day-ahead energy market. In the West, two day-ahead and real-time market offerings have emerged: (i) Cal-ISO's extended Day Ahead Market ("EDAM") and (ii) Southwest Power Pool's Markets+ ("Markets+"), both of which have FERC-approved tariffs.

In February 2025, BPA committed to fund Phase 2 of Markets+, which will include remaining development through the market go-live. Based on the current parties supporting Phase 2 (which will involve a two-stage process), BPA's total commitment for Phase 2 will not exceed \$40.2 million in development costs incurred by Southwest Power Pool (SPP). Bonneville's commitment for Phase 2, Stage 1 is \$26.8 million as of March 31, 2025. BPA's commitment for Phase 2, Stage 2 could be up to an additional \$13.4 million beginning in August 2025. However, BPA expects additional parties to join the Phase 2 effort, which will reduce its overall share of Phase 2, Stage 2 costs.

If BPA joins Markets+, development costs will be recovered pursuant to a rate applied to each market transaction likely over the first five to ten years of market operations. If the Markets+ effort does not continue, for reasons including but not limited to SPP ceasing to offer a day-head market, BPA will be responsible for its proportionate share of development costs incurred up to the time of termination and not to exceed \$40.2 million. BPA has not recorded a liability in connection with this Phase 2 Markets+ funding commitment as no present obligation to repay these implementation costs exists.

After thorough evaluation of the EDAM and Markets+ market options including governance, operational and commercial impacts, and other factors, BPA released a Draft Policy to join Markets+ in March 2025. BPA expects to evaluate stakeholder comments and release a final policy and record of decision in May 2025.

## Additional Information

To see BPA's annual and quarterly reports, go to [www.bpa.gov/about/finance/investor-relations](http://www.bpa.gov/about/finance/investor-relations)
