

Quarterly Financial Report

2026 Second Quarter

Q2

Management's Discussion and Analysis

Profile

The Bonneville Power Administration (BPA) is a nonprofit federal power marketing administration based in the Pacific Northwest. Although BPA is part of the U.S. Department of Energy, it is statutorily separate and distinct, and is self-financed through the selling of its products and services. BPA markets wholesale electrical power from 31 federal hydroelectric projects in the Northwest, one nonfederal nuclear plant and several small nonfederal power plants. The dams are operated by the U.S. Army Corps of Engineers (USACE) and the Bureau of Reclamation (Reclamation) with BPA funding power share costs. The nonfederal nuclear plant, Columbia Generating Station, is owned and operated by Energy Northwest, a joint operating agency of the state of Washington.

BPA provides about one-third of the electric power generated in the Northwest, primarily from reliable, dispatchable and flexible hydroelectric resources. BPA also operates and maintains approximately 15,000 circuit miles of high-voltage transmission in its service territory. BPA's territory includes Idaho, Oregon, Washington, western Montana and small parts of eastern Montana, California, Nevada, Utah and Wyoming.

BPA promotes energy conservation and innovative technologies that improve its ability to deliver on its mission. To mitigate the impacts of the federal dams, BPA implements a fish and wildlife program that includes working with its partners to make the federal dams safer for fish passage.

BPA is committed to public service and seeks to make decisions in a manner that provides opportunities for input from all interested parties. In its vision statement, BPA dedicates itself to providing high system reliability, low rates consistent with sound business principles, environmental stewardship and accountability.

General

The Federal Columbia River Power System (FCRPS) financial statements combine the accounts of BPA with the accounts of the federal hydropower generating facilities in the Pacific Northwest operated by the USACE and Reclamation. The FCRPS combined financial statements also include the operations and maintenance costs of the U.S. Fish and Wildlife Service for the Lower Snake River Compensation Plan facilities. Consolidated with BPA is a variable interest entity (VIE) of which BPA is the primary beneficiary, and from which BPA leases certain transmission facilities. The FCRPS fiscal year is from Oct. 1 to Sept. 30.

Use of Estimates and Forward-Looking Information

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

This Management's Discussion and Analysis (MD&A) is unaudited and may contain statements which, to the extent they are not recitations of historical facts, constitute "forward-looking statements." In this respect, the words "planned," "predict," "could," "estimate," "expect" and similar expressions are intended to identify forward-looking statements. Several important factors affecting FCRPS business and financial results could cause actual results to differ materially from those stated in forward-looking statements due to factors such as changes in economic, industry, political and business conditions; changes in laws, regulations and policies and the application of the laws; and changes in weather patterns, hydroelectric conditions and power services supply and demand. BPA does not plan to issue updates or revisions to the forward-looking statements.

Rates

Rates for Fiscal Years 2026-2028

To establish rates for fiscal years 2026 through 2028, BPA concluded the BP-26 rate proceeding in July 2025 by releasing the Administrator's Final Record of Decision and Final Proposal. Rates went into effect on Oct. 1, 2025, and will be effective through Sept. 30, 2028. The Federal Energy Regulatory Commission (FERC) reviews BPA's proposed rates to ensure they recover BPA's costs. FERC typically grants approval of BPA's rates on an interim basis at the beginning of a rate period, pending final approval. FERC granted final approval of the BP-26 Power and Transmission rates in February 2026. The average effective increase for the Priority Firm Tier 1 power rate, which represents the majority of BPA's power sales is 8.9%, and does not include the impacts of the Financial Reserves Policy Surcharge described below. The average transmission service rate increase across all products is 19.9%.

As with the 2024-2025 rate period, power and transmission rates in the BP-26 rate period include rate adjustment mechanisms, such as the Cost Recovery Adjustment Clause (CRAC), Financial Reserves Policy (FRP) Surcharge and Reserves Distribution Clause (RDC), which BPA employs if certain financial conditions occur. If power financial reserves and agency reserves are above their respective upper thresholds, and the RDC amount is greater than \$5 million, the BPA Administrator shall consider the above-threshold power financial reserves for debt reduction, incremental capital investment, rate reduction through a Dividend Distribution, distribution to customers, or any business line specific purposes determined by the BPA Administrator, in alignment with the BP-26 rate case. Any above-threshold financial reserves for transmission shall be applied to rate reduction through a Transmission Dividend Distribution, in alignment with the BP-26 Transmission Rates Settlement Agreement.

Based upon fiscal year 2025 financial results, a Power Surcharge triggered for \$40 million to be collected from December 2025 through September 2026, resulting in an effective rate increase of 2.2% for Power Services. As of March 31, 2026, BPA has billed customers \$17.4 million for the FRP surcharge. The surcharge is reassessed at the close of each fiscal year and may again trigger for application in fiscal year 2027.

Results of Operations

Operating revenues

A comparison of FCRPS operating revenues follows for the six months ended March 31, 2026, and March 31, 2025:

| <i>(Millions of dollars)</i> | Fiscal Year 2026 | Fiscal Year 2025 | Revenue Increase (Decrease) | % Change |
|------------------------------|------------------------|------------------------|-----------------------------------|-------------|
| Sales | | | | |
| Consolidated sales | | | | |
| Power gross sales | \$ 1,661.5 | \$ 1,544.8 | \$ 116.7 | 8 % |
| Transmission | 707.2 | 604.1 | 103.1 | 17 |
| Bookouts (Power) | (25.1) | (35.5) | 10.4 | (29) |
| Consolidated sales | 2,343.6 | 2,113.4 | 230.2 | 11 |
| Other revenues | | | | |
| Power | 21.5 | 15.8 | 5.7 | 36 |
| Transmission | 31.5 | 26.6 | 4.9 | 18 |
| Other revenues | 53.0 | 42.4 | 10.6 | 25 |
| Sales | 2,396.6 | 2,155.8 | 240.8 | 11 |
| U.S. Treasury credits | 52.1 | 98.3 | (46.2) | (47) |
| Total operating revenues | \$ 2,448.7 | \$ 2,254.1 | \$ 194.6 | 9 |

Total operating revenues increased \$194.6 million when compared to the same period of fiscal year 2025. Sales of Power and Transmission Services, including other revenues and the effect of bookouts, increased \$240.8 million.

Power gross sales increased \$116.7 million.

- Surplus power sales, including revenue from derivative instruments settled with physical deliveries, increased \$118.4 million primarily due to higher streamflows and increased precipitation leading to more water available for power generation when compared to the same period of fiscal year 2025.
- Firm power sales decreased \$1.7 million primarily due to a decrease in load shaping revenues of \$58.6 million due to weather variability. Partially offsetting this decrease was a \$44 million increase in revenues across multiple product categories due to new rates that went into effect at the start of fiscal year 2026. Additionally, \$17.4 million was recorded under the FRP surcharge that was implemented for fiscal year 2026 rates but was not in effect for the prior rate period.

Transmission sales increased \$103.1 million primarily due to new rates that went into effect at the start of fiscal year 2026.

Power other revenues increased \$5.7 million due to an increase in realized gains associated with financial future trades. BPA uses financial futures contracts on energy as an operational hedge to mitigate price volatility in the physical energy market. Financial futures contracts are settled financially and not through the delivery of power.

Transmission other revenues increased \$4.9 million primarily due to an increase in reimbursable revenues associated with work performed for BPA customers. Reimbursable revenues are generally offset by an equivalent amount of reimbursable expenses.

Bookouts are presented on a net basis in the Combined Statements of Revenues and Expenses. When sales and purchases are scheduled with the same counterparty on the same transmission path for the same hour, the power is typically booked out and not scheduled for physical delivery. The megawatt-hours that offset each other net to zero. The dollar values of these offsetting transactions reduce both sales and purchased power expense and are recorded as bookouts. Therefore, the accounting treatment for bookouts has no effect on net revenues, cash flows or margins.

U.S. Treasury credits for fish and wildlife mitigation decreased \$46.2 million when compared to the same period of fiscal year 2025. This decrease was due to lower volumes of replacement power purchases at lower market prices when compared to results through the second quarter of the prior fiscal year. Under the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act), BPA reduces its annual payment to the U.S. Treasury for the nonpower portion of expenditures, set at 22.3%, that BPA makes for fish and wildlife protection, mitigation and enhancement. Through the fiscal year, BPA records anticipated U.S. Treasury credits earned through the reporting period. At fiscal year-end, BPA calculates and records the annual amount of U.S. Treasury credits earned.

Operating expenses

A comparison of FCRPS operating expenses follows for the six months ended March 31, 2026, and March 31, 2025:

| <i>(Millions of dollars)</i> | Fiscal Year 2026 | Fiscal Year 2025 | Expense Increase (Decrease) | % Change |
|--|------------------------|------------------------|-----------------------------------|-------------|
| Operations and maintenance | \$ 1,293.6 | \$ 1,277.0 | \$ 16.6 | 1 % |
| Purchased power | 126.9 | 302.5 | (175.6) | (58) |
| Depreciation, amortization and accretion | 474.2 | 440.3 | 33.9 | 8 |
| Total operating expenses | <u>\$ 1,894.7</u> | <u>\$ 2,019.8</u> | <u>\$ (125.1)</u> | <u>(6)</u> |

Total operating expenses decreased \$125.1 million when compared to the same period of fiscal year 2025.

Operations and maintenance expense increased \$16.6 million primarily due to the following factors:

- \$13.6 million increase in USACE expenses due to increases in the amount of work performed.
- \$9.8 million increase in transmission maintenance expenses due to an increase in the amount of work performed related to transmission line and non-electric maintenance.
- \$8.6 million increase in Residential Exchange Program (REP) costs in alignment with the 2012 REP Settlement Agreement. Under this agreement, which expires at the end of fiscal year 2028, the amount of REP costs recorded increases at the start of each new rate period.
- \$7 million expense increase related to the amortization of the Phase 2 Implementation Plan Settlement Agreement regulatory asset. In alignment with the BP-26 rate case, amortization began in fiscal year 2026 and will continue through 2043.

- \$4.8 million increase to Fish and Wildlife Program expenses due to greater amounts of work performed when compared to the same period of fiscal year 2025.
- \$4.4 million increase in transmission vegetation management costs due to an increase in the amount of work performed.
- \$3.1 million increase in control center support expenses driven by increased work.
- \$7.9 million net increase to various other Transmission, Power and Enterprise Services program costs primarily due to increases in service contract costs offset by decreases in personnel costs.

These increases were partially offset by:

- \$30.6 million decrease to Columbia Generating Station costs primarily due to fiscal year 2025 being a refueling year. Refueling occurs biennially, most recently in fiscal year 2025, and refueling and maintenance expenses are higher in refueling years.
- \$7.1 million decrease in third-party General Transfer Agreement (GTA) wheeling expenses due to lower loads when compared to the same period of fiscal year 2025.
- \$4.9 million decrease in conservation purchases due to less energy conservation projects completed by customers.

Purchased power expense, including the effects of bookouts, decreased \$175.6 million primarily due to the following factors:

- \$202.9 million decrease in power purchases due to comparatively warm and wet weather experienced through the second quarter of fiscal year 2026, which reduced BPA's need to purchase power.
- \$27.4 million increase driven by the expiration of certain water storage agreements with BC Hydro during fiscal year 2025. As of Dec. 31, 2024, BPA was owed approximately \$27 million, which reduced fiscal year 2025 expense and led to the year over year increase.

Depreciation, amortization and accretion increased \$33.9 million primarily due to a combination of increased utility plant assets in service and higher depreciation rates leading to an increase in depreciation expense of \$32.8 million.

Interest expense and other income, net

A comparison of FCRPS interest expense and other income, net, follows for the six months ended March 31, 2026, and March 31, 2025:

(Millions of dollars)

| | Fiscal Year 2026 | Fiscal Year 2025 | Expense Increase (Decrease) | % Change |
|--|------------------------|------------------------|-----------------------------------|-------------|
| Interest expense | \$ 236.8 | \$ 228.9 | \$ 7.9 | 3 % |
| Irrigation assistance | 11.0 | 6.7 | 4.3 | 64 |
| Allowance for funds used during construction | (39.9) | (34.7) | (5.2) | 15 |
| Interest income | (8.9) | (16.3) | 7.4 | (45) |
| Other, net | (13.6) | (178.0) | 164.4 | (92) |
| Total interest expense and other income, net | <u>\$ 185.4</u> | <u>\$ 6.6</u> | <u>\$ 178.8</u> | NM* |

*The percentage change is not meaningful.

Total interest expense and other income, net, increased \$178.8 million when compared to the same period of fiscal year 2025.

Interest expense increased \$7.9 million, primarily due to a \$10.6 million increase in interest expense related to Borrowings from U.S. Treasury and Nonfederal debt, which was driven by increased debt balances and higher interest rates. Partially offsetting this increase was a \$4.2 million decrease driven by increased amortization of nonfederal debt premiums, which reduce interest expense.

Irrigation assistance expense increased \$4.3 million when compared to the same period of fiscal year 2025. Reclamation provides BPA with the amount of irrigation assistance to be repaid each year, and repayment is typically scheduled in line with the expected life of each related irrigation project.

Allowance for funds used during construction (AFUDC) increased \$5.2 million due to higher Construction work in progress balances and higher interest rates when compared to the same period in fiscal year 2025. For additional information on how the rates applied to AFUDC are calculated each year, see Note 1, Summary of Significant Accounting Policies, in BPA's 2025 Annual Report.

Interest income decreased \$7.4 million as a result of lower amounts of U.S. Treasury market-based special securities due to lower cash balances coupled with lower interest rates received from U.S. Treasury. These investments have original maturities of 90 days or less and are recorded as Cash and cash equivalents on the Combined Balance Sheets.

Other, net changed \$164.4 million. In February 2025, BPA recognized a \$165.9 million gain in connection with the early extinguishment of U.S. Treasury debt. BPA has not recorded a similar transaction during fiscal year 2026.

Accrued Construction work in progress

Amounts accrued in Accounts payable and other on the Combined Balance Sheet for Construction work in progress assets were approximately \$115 million and \$118 million as of March 31, 2026, and 2025, respectively.

Other Operational Matters

Energy Northwest Line of Credit Activity

In December 2024, Energy Northwest entered into a \$120 million line of credit arrangement to provide interim financing to pay for certain costs of the Columbia Generating Station nuclear facility. Amounts borrowed are due to be repaid on or before Dec. 16, 2026.

Of the available \$120 million, \$39.7 million is currently outstanding, as described below.

As of Sept. 30, 2025, Energy Northwest had borrowed \$6.2 million. Through the second quarter of fiscal year 2026, Energy Northwest has borrowed an additional \$33.5 million. These borrowings provide interim financing for capital costs associated with an extended power uprate project that will increase the output of the Columbia Generating Station. Energy Northwest expects to repay these amounts with bond proceeds in fiscal year 2026.

U.S. Treasury Liquidity Facility

In December 2025, BPA issued \$150 million of short-term debt on its liquidity facility with the U.S. Treasury to meet operating expenses and manage within-year working capital. BPA repaid this amount in March 2026.

BP-27 Rate Case

On March 31, 2026, BPA held a customer workshop to discuss BPA's plan to conduct an expedited Section 7(i) rate case process to address the financial impact of the U.S. District Court for the District of Oregon's Amended Preliminary Injunction Order issued March 2, 2026. The annual expected cost of the court-ordered operations is approximately \$100 million and will impact every year of the three-year rate period. As such, BPA is proposing limited revisions to add power rate adjustment mechanisms to the fiscal year 2026 - 2028 Wholesale Power Rate Schedules and General Rate Schedule Provisions (GRSPs) to address the financial impact of court-ordered operations. The rate case will begin with the release of the Federal Record Notice and is expected to conclude with a Final Record of Decision in July 2026, with implementation of new rates Oct. 1, 2026, for application in fiscal years 2027 and 2028.

Additional Information
