

2025 Oversupply Management

October 22, 2025

Comparison of Water Years

Natural Flows Comparison at The Dalles

2025 Summary of Oversupply Management Protocol

- The Jan-Jul water volume for 2025 was 81.4 MAF. The NWRFC 30-year Jan-Jul water volume average (1991-2020) is 103.7 MAF.
- The final water volume that passed The Dalles in Water Year 2025 was 105.3 MAF; 80% of normal annual volume of 132.3 MAF.
- In 2025, no OMP events occurred. As a result, no generators were displaced and no displacement costs were paid or recovered, nor were any loss waivers executed.
- BPA hosted the annual JOC meeting on March 5th, 2025.
- The OMP Annual System Test was successfully implemented on March 25th, proving systems were operational.

Where to Find More Information
